Introduction

Overview

Category 9 consists of five types of messages exchanged between financial institutions, either on behalf of themselves, other financial institutions, or customers. These are:

1. balance reporting messages, which provide both cash management and nostro reconciliation information (balance and transaction details).
2. an interest rate change(s) message, which provides a means of advising interest rate change(s) to the Receiver of the message.
3. netting messages (sent between financial institutions and netting systems), which enable financial institutions to receive balances and details about transactions which are included in the netting process.
4. status messages, which provide a mechanism for requesting and responding to business-related information about customers or institutions.
5. bilateral key exchange messages, which enable financial institutions to request, exchange and cancel authenticator keys with other financial institutions.

Changes

This volume incorporates the following changes to Category 9 - Cash Management and Customer Status as noted in the *Standards Release Guide (SRG) 2012* and the relevant updates to the SRG 2012:

- New usage rules to formalise the correct use of references and related references across a set of cover payment messages.
- Relaxed a network validated rule on field 50A in the MT 910 to accommodate financial institutions that make payments to customers.

IMPORTANT: This volume contains information effective as of the November 2012 Standards Release. Therefore the 22 July 2011 edition of the User Handbook Standards MT volumes remains effective until November 2012.

Volume Formatting Explanation

This volume of the Standards User Handbook set contains general information about the category and a detailed description of each message type which is currently available for use. For each message type, the following information is provided:

Message Type Scope

The scope specifies the Sender and Receiver of the message and provides an explanation on how the message is used. In some messages, an example of the message flow is also provided.

Message Type Format Specifications

The format specifications are the rules for the layout of the message type. This information is provided in table form with the following information:

MT nnn (Message Type Name)

Status	Tag	Field Name	Content/Options	No.
M	20	Transaction Reference Number	16x	1
M	21	Related Reference	16x	2
Mandatory Sequence A (Sequence Name)				
M	25	Account Identification	35x	3
M	32a	Value Date, Currency Code, Amount	C or D	4
-----> Optional Repetitive Sequence B (Sequence Name)				
O	52a	Ordering Institution	A or D	5
M	71B	Details of Charges	6*35x	6
O	72	Sender to Receiver Information	6*35x	7

M = Mandatory O = Optional				

- **MT nnn (Message Type Name)** provides the message type number and name
- **Status** indicates if the field is
 - **M** - Mandatory
 - **O** - Optional

The status **M** for fields in optional (sub)sequences means that the field must be present if the (sub)sequence is present and is otherwise not allowed.

- **Tag** is the field identification.
- **Field Name** is the detailed name of the field tag, for this message type.
- **Content/Options** provides permitted field length and characteristics. For information concerning field structure, notation and character restrictions, see the *Standards MT General Information*.
- **No.** identifies the number of the field in the Field Specifications for the message type.

Some messages are separated into sequences of fields, as shown above. An arrow indicates that a sequence of fields may be repeated.

MT Network Validated Rules

Network validated rules are validated on the network, that is, rules for which an error code is defined. Rules specified in this section affect more than one field in the message, placing a **condition** on one of the fields specified. They are identified as **Cn**, or conditional rules.

MT Usage Rules

Usage rules are not validated on the network, that is, rules for which no error code is defined, but are nevertheless mandatory for the correct usage of the message. Rules specified in this section affect more than one field in the message, or more than one SWIFT message.

MT Guidelines

Guidelines are not validated on the network and are not mandatory for the correct usage of the message. They concern good practices. Guidelines specified in this section affect more than one field in the message, or more than one SWIFT message.

MT Field Specifications

The rules for the use of each field in the message are specified in this section. Each field is identified by its index number (as shown in the **No.** column of the MT Format Specifications), field tag and detailed field name, followed by a description of the field, which may contain some or all of the following:

- **FORMAT** specifies the field formats which are allowed for the field.
- **PRESENCE** indicates if the field is mandatory, optional or conditional in its sequence.
- **DEFINITION** specifies the definition of the field in the message type.
- **CODES** lists all codes available for use in the field. If there is more than one subfield for which codes are defined, each separate code list will be identified with a **CODES** heading. When a list of codes is validated by the network, the error code will be specified.
- **NETWORK VALIDATED RULES** specifies rules that are validated on the network, that is, rules for which an error code is defined. Generally, rules specified in this section affect only the field in which they appear. In some cases, rules which are validated at the message level, that is, rules which affect more than one field, are repeated in this section. This is the case when the rule does not affect the presence of the field, but information within several fields, for example, a currency which must be the same for more than one field in the message.
- **USAGE RULES** specifies rules that are not validated on the network, that is, rules for which no error code is defined, but are nevertheless mandatory for the correct usage of the field. Rules specified in this section affect only the field in which they appear.
- **MARKET PRACTICE RULES** specifies rules published by the Payments Market Practice Group (PMPG). It informs the reader of the existence of a global market practice document on the business process in which the concerned field is used. The absence of a market practice rule notation does not mean that no market practices exist for the concerned field. The presence of a market practice rule is merely an indicator of a known market practice. Furthermore, readers should be aware that in addition to global market practices there may also be country specific requirements that should be considered when using the field. For more details on PMPG market practice documentation, refer to www.pmpg.info.
- **EXAMPLES** provides one or more examples of the field as it will be formatted/used.

MT Mapping

MT mapping provides an explanation of how to map the fields of the message into another SWIFT message, either of the same or a different message type.

MT Examples

Examples are provided to illustrate the correct use of a message. Examples always include the following information:

- **Narrative** provides a brief description of a transaction
- **Information Flow** illustrates the relationships between the parties involved in the message. An explanation of the flow diagram can be found in the *Standards MT General Information*.
- **SWIFT Format** provides the message using the defined SWIFT format, and providing an explanation, where necessary, of the fields which have been used.

Category 9 Message Types

The following table lists all message types defined in category 9.

For each message type, there is a short description, an indicator whether the message type requires authentication (Y or N), the maximum message length on input (2,000 or 10,000 characters), whether the use of the message requires registration with SWIFT for use in a message user group (Y or N), and whether value date ordering (VDO) can be requested for the message (Y/N). Value date ordering criteria are described in the *Standards MT General Information*.

MT	MT Name	Purpose	Authen.	Max. Length	MUG	VDO
900	Confirmation of Debit	Advises an account owner of a debit to its account	N	2,000	N	N
910	Confirmation of Credit	Advises an account owner of a credit to its account	N	2,000	N	Y
920	Request Message	Requests the account servicing institution to send an MT 940, 941, 942 or 950	N	2,000	N	N
935	Rate Change Advice	Advises the Receiver of general rate change(s) and/or rate change(s) which applies to a specific account other than a call/notice loan/deposit account	N	2,000	N	N
940	Customer Statement Message	Provides balance and transaction details of an account to a financial institution on behalf of the account owner	N	2,000	N	N
941	Balance Report	Provides balance information of an account to a financial institution on behalf of the account owner	N	2,000	N	N
942	Interim Transaction Report	Provides balance and transaction details of an account, for a specified period of time, to a financial institution on behalf of the account owner	N	2,000	N	N
950	Statement Message	Provides balance and transaction details of an account to the account owner	N	2,000	N	N
970	Netting Statement	Provides balance and transaction details of a netting position as recorded by a netting system	N	2,000	N	N

MT	MT Name	Purpose	Authen.	Max. Length	MUG	VDO
971	Netting Balance Report	Provides balance information for specified netting position(s)	N	2,000	N	N
972	Netting Interim Statement	Advises interim balance and transaction details of a netting position as recorded by a netting system	N	2,000	N	N
973	Netting Request Message	Requests an MT 971 or 972 containing the latest available information	N	2,000	N	N
985	Status Enquiry	Requests an MT 986	N	2,000	N	N
986	Status Report	Provides business related information about a customer or institution	N	2,000	N	N
990	Advice of Charges, Interest and Other Adjustments	Advises an account owner of charges, interest or other adjustments to its account	N	2,000	N	N
991	Request for Payment of Charges, Interest and Other Expenses	Requests payment of charges, interest or other expenses	N	2,000	N	N
992	Request for Cancellation	Requests the Receiver to consider cancellation of the message identified in the request	N	2,000	N	N
995	Queries	Requests information relating to a previous message or amendment to a previous message	N	2,000	N	N
996	Answers	Responds to an MT 995 Queries or MT 992 Request for Cancellation or other messages where no specific message type has been provided for the response	N	2,000	N	N
998	Proprietary Message	Contains formats defined and agreed to between users and for those messages not yet live	N	10,000	N	N
999	Free Format Message	Contains information for which no other message type has been defined	N	2,000	N	N

Note: A Message User Group (MUG), for the purposes of this book, is a group of users who have voluntarily agreed to support the specified message type and have registered with SWIFT to send or

receive the specified message type. These messages are indicated in the preceding table in the column MUG.

Registration is free of charge. To register to use one or more message types, submit a registration request (**Register to a Message User Group**) through the forms available on www.swift.com > Ordering > Order products and services.

To withdraw from a MUG, use the **Deregister from a Message User Group** request. These forms are available at www.swift.com > Ordering > Terminate and deactivate.

To get the list of other members of a particular MUG, send an MT 999 to the Customer Implementation team (SWHQBEBCOS).

Euro - Impact on Category Message Standards

See the *Standards MT General Information* for full details of the Euro-Related Information (ERI) and the impact on Standards MT message types.

MT 900 Confirmation of Debit

MT 900 Scope

This message type is:

- sent by an account servicing institution to an account owner.
- sent by an account servicing institution to a party authorised by the account owner to receive the information.
- sent by a concentrating financial institution to an account owner or a party authorised by the account owner to receive the information.

It is used to notify the account owner of an entry which has been debited to its account. The entry will be further confirmed by statement.

For use of messages in the corporate to bank environment, see the MT message implementation guide for corporate customers available on www.swift.com.

MT 900 Format Specifications

MT 900 Confirmation of Debit

Status	Tag	Field Name	Content/Options	No.
M	20	Transaction Reference Number	16x	1
M	21	Related Reference	16x	2
M	25	Account Identification	35x	3
M	32A	Value Date, Currency Code, Amount	6!n3!a15d	4
O	52a	Ordering Institution	A or D	5
O	72	Sender to Receiver Information	6*35x	6
M = Mandatory, O = Optional				

MT 900 Network Validated Rules

There are no network validated rules for this message type.

MT 900 Usage Rules

- This message type is not normally sent if statements for the account are frequently transmitted.
- This message type does not normally result in any bookings. It is a confirmation to the Receiver (account owner) of a debit to its account.

MT 900 Field Specifications

1. Field 20: Transaction Reference Number

FORMAT

16x

PRESENCE

Mandatory

DEFINITION

This field specifies the reference assigned by the Sender to unambiguously identify the message.

NETWORK VALIDATED RULES

This field must not start or end with a slash '/' and must not contain two consecutive slashes '/' (Error code(s): T26).

2. Field 21: Related Reference

FORMAT

16x

PRESENCE

Mandatory

DEFINITION

This field contains the reference number of the transaction which resulted in this message, for example, the field 20 Transaction Reference Number of the SWIFT payment instruction.

NETWORK VALIDATED RULES

This field must not start or end with a slash '/' and must not contain two consecutive slashes '/' (Error code(s): T26).

3. Field 25: Account Identification

FORMAT

35x

PRESENCE

Mandatory

DEFINITION

This field identifies the account which has been debited.

4. Field 32A: Value Date, Currency Code, Amount

FORMAT

Option A	6!n3!a15d	(Date)(Currency)(Amount)
----------	-----------	--------------------------

PRESENCE

Mandatory

DEFINITION

This field specifies the value date, currency code and amount of the debit.

NETWORK VALIDATED RULES

Date must be a valid date expressed as YYMMDD (Error code(s): T50).

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for that specific currency as specified in ISO 4217 (Error code(s): C03,T40,T43).

5. Field 52a: Ordering Institution

FORMAT

Option A	[/1!a]/[34x] 4!a2!a2!c[3!c]	(Party Identifier) (Identifier Code)
Option D	[/1!a]/[34x] 4*35x	(Party Identifier) (Name and Address)

PRESENCE

Optional

DEFINITION

This field identifies the institution which instructed the Sender to execute the transaction resulting in this debit, when other than the Receiver.

CODES

In option A, Party Identifier may be used to indicate a national clearing system code.

The following codes may be used, preceded by a double slash '//':

AT	5!n	Austrian Bankleitzahl
AU	6!n	Australian Bank State Branch (BSB) Code

BL	8!n	German Bankleitzahl
CC	9!n	Canadian Payments Association Payment Routing Number
ES	8..9n	Spanish Domestic Interbanking Code
FW	without 9 digit code	Pay by Fedwire
GR	7!n	HEBIC (Hellenic Bank Identification Code)
HK	3!n	Bank Code of Hong Kong
IE	6!n	Irish National Clearing Code (NSC)
IN	11!c	Indian Financial System Code (IFSC)
IT	10!n	Italian Domestic Identification Code
PL	8!n	Polish National Clearing Code (KNR)
PT	8!n	Portuguese National Clearing Code
SC	6!n	UK Domestic Sort Code

CODES

In option D, Party Identifier may be used to indicate a national clearing system code.

The following codes may be used, preceded by a double slash '//':

AT	5!n	Austrian Bankleitzahl
AU	6!n	Australian Bank State Branch (BSB) Code
BL	8!n	German Bankleitzahl
CC	9!n	Canadian Payments Association Payment Routing Number
CH	6!n	CHIPS Universal Identifier
CP	4!n	CHIPS Participant Identifier
ES	8..9n	Spanish Domestic Interbanking Code
FW	9!n	Fedwire Routing Number
GR	7!n	HEBIC (Hellenic Bank Identification Code)
HK	3!n	Bank Code of Hong Kong
IE	6!n	Irish National Clearing Code (NSC)
IN	11!c	Indian Financial System Code (IFSC)
IT	10!n	Italian Domestic Identification Code
PL	8!n	Polish National Clearing Code (KNR)
PT	8!n	Portuguese National Clearing Code
RU	9!n	Russian Central Bank Identification Code
SC	6!n	UK Domestic Sort Code
SW	3..5n	Swiss Clearing Code (BC code)
SW	6!n	Swiss Clearing Code (SIC code)

NETWORK VALIDATED RULES

Identifier Code must be a registered financial institution BIC (Error code(s): T27,T28,T29,T45).

Identifier Code must be a financial institution BIC. This error code applies to all types of BICs referenced in a FIN message including SWIFT BICs, non-SWIFT BICs, Masters, Synonyms, Live destinations and Test & Training destinations (Error code(s): C05).

USAGE RULES

The coded information contained in field 52a must be meaningful to the Receiver of the message.

Option A is the preferred option.

Option D should only be used when the ordering financial institution has no BIC.

6. Field 72: Sender to Receiver Information

FORMAT

6*35x (Narrative)

In addition to narrative text, structured text with the following line formats may be used:

Line 1	/8c/[additional information]	(Code)(Narrative)
Lines 2-6	[/continuation of additional information]	(Narrative)
	or	or
	[/8c/[additional information]]	(Code)(Narrative)

PRESENCE

Optional

DEFINITION

This field contains additional information for the Receiver.

USAGE RULES

This field may contain information only (that is, no instructions may be included).

The structured format may be used for bilaterally agreed codes.

Additional explanatory information, which may be continued on the next lines, is preceded by a double slash '//'.
 '//

This field may contain ERI to transport dual currencies, as explained in the chapter 'Euro - Impact on Category 9 Message Standards'.

In order to comply with the EC-directive on cross border credit transfers, the optional code word EXCH may be used to transport an exchange rate. In line with ERI, the code word EXCH is placed between slashes, followed by the exchange rate, format 12d, and terminated with another slash.

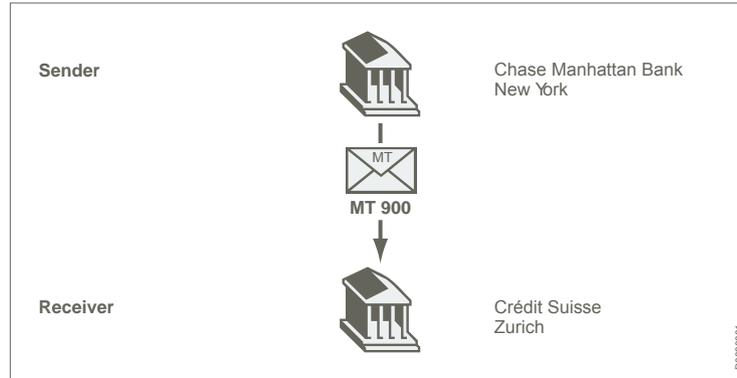

MT 900 Examples

Narrative

Value 23 January 2009, Crédit Suisse, Zürich, requests Chase Manhattan Bank, New York, to pay US dollars 233,530 to Berliner Bank, Berlin, under reference 5482ABC.

Chase sends the following confirmation to Crédit Suisse:

Information Flow

SWIFT Message

Explanation	Format
Sender	CHASUS33
Message Type	900
Receiver	CRESCHZZ
Message Text	
Transaction Reference Number	:20:C11126A1378
Related Reference	:21:5482ABC
Account Identification ⁽¹⁾	:25:9-9876543
Value Date, Currency Code, Amount	:32A:090123USD233530,
End of Message Text/Trailer	

(1) The number of the account that has been debited.

MT 910 Confirmation of Credit

MT 910 Scope

This message is:

- sent by an account servicing institution to an account owner.
- sent by an account servicing institution to a party authorised by the account owner to receive the information.
- sent by a concentrating financial institution to an account owner or a party authorised by the account owner to receive the information.

It is used to notify the account owner of an entry which has been credited to its account. The entry will be further confirmed by statement.

For use of messages in the corporate to bank environment, see the MT message implementation guide for corporate customers available on www.swift.com.

MT 910 Format Specifications

MT 910 Confirmation of Credit

Status	Tag	Field Name	Content/Options	No.
M	20	Transaction Reference Number	16x	1
M	21	Related Reference	16x	2
M	25	Account Identification	35x	3
M	32A	Value Date, Currency Code, Amount	6!n3!a15d	4
O	50a	Ordering Customer	A, F, or K	5
O	52a	Ordering Institution	A or D	6
O	56a	Intermediary	A or D	7
O	72	Sender to Receiver Information	6*35x	8
M = Mandatory, O = Optional				

MT 910 Network Validated Rules

C1 Either field 50a or field 52a must be present, but not both (Error code(s): C06):

If field 50a is ...	Then field 52a is ...
Present	Not allowed
Not present	Mandatory

MT 910 Usage Rules

- This message type is not normally sent if statements for the account are frequently transmitted.
- This message type does not normally result in any bookings. It is a confirmation to the Receiver (account owner) of a credit to its account.
- Where a correspondent bank has received a cover payment and sends a confirmation of credit (MT 910) to the Beneficiary Bank, the reference from field 21 of the inward payment message must be passed on unchanged in field 21 of the MT 910 message.

MT 910 Field Specifications

1. Field 20: Transaction Reference Number

FORMAT

16x

PRESENCE

Mandatory

DEFINITION

This field specifies the reference assigned by the Sender to unambiguously identify the message.

NETWORK VALIDATED RULES

This field must not start or end with a slash '/' and must not contain two consecutive slashes '/' (Error code(s): T26).

2. Field 21: Related Reference

FORMAT

16x

PRESENCE

Mandatory

DEFINITION

This field contains the reference for the account owner (Receiver), for example, field 21, from the SWIFT message which resulted in this credit.

NETWORK VALIDATED RULES

This field must not start or end with a slash '/' and must not contain two consecutive slashes '/' (Error code(s): T26).

USAGE RULES

This reference must be copied unchanged from the inward message that caused the credit on the account, for example, field 20 of a received MT 103, or field 21 of the MT 202 (or MT 205) or MT 202 COV (or MT 205 COV) must be copied unchanged to this field.

3. Field 25: Account Identification**FORMAT**

35x

PRESENCE

Mandatory

DEFINITION

This field identifies the account which has been credited.

4. Field 32A: Value Date, Currency Code, Amount**FORMAT**

Option A	6!n3!a15d	(Date)(Currency)(Amount)
----------	-----------	--------------------------

PRESENCE

Mandatory

DEFINITION

This field specifies the value date, currency code and amount of the credit.

NETWORK VALIDATED RULES

Date must be a valid date expressed as YYMMDD (Error code(s): T50).

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for that specific currency as specified in ISO 4217 (Error code(s): C03,T40,T43).

5. Field 50a: Ordering Customer**FORMAT**

Option A	[/34x] 4!a2!a2!c[3!c]	(Account) (Identifier Code)
Option F	35x 4*35x	(Party Identifier) (Name and Address)
Option K	[/34x] 4*35x	(Account) (Name and Address)

In option F, the following line formats must be used: (Error code(s): T54)

Line 1 (subfield Party Identifier) /34x	(Account)
Lines 2-5 (subfield Name and Address) 1!n/33x	(Number)(Details)

Or

Line 1 (subfield Party Identifier) 4!a/2!a/27x	(Code)(Country Code)(Identifier)
Lines 2-5 (subfield Name and Address) 1!n/33x	(Number)(Details)

PRESENCE

Conditional (see rule C1)

DEFINITION

This field identifies the customer or financial institution (from a Category 1 Payment), which originated the transaction resulting in this credit.

CODES

In option F, when Party Identifier is used with the (Code)(Country Code)(Identifier) format, one of the following codes must be used in Code (Error code(s): T55):

ARNU	Alien Registration Number	The code followed by a slash, '/' must be followed by the ISO country code, a slash, '/' and the Alien Registration Number.
CCPT	Passport Number	The code followed by a slash, '/' must be followed by the ISO country code, a slash, '/' and the Passport Number.
CUST	Customer Identification Number	The code followed by a slash, '/' must be followed by the ISO country code of the issuer of the number, a slash, '/', the issuer of the number, a slash, '/' and the Customer Identification Number.
DRLC	Driver's Licence Number	The code followed by a slash, '/' must be followed by the ISO country code of the issuing authority, a slash, '/', the issuing authority, a slash, '/' and the Driver's Licence Number.
EMPL	Employer Number	The code followed by a slash, '/' must be followed by the ISO country code of the registration authority, a slash, '/', the registration authority, a slash, '/' and the Employer Number.
NIDN	National Identity Number	The code followed by a slash, '/' must be followed by the ISO country code, a slash, '/' and the National Identity Number.
SOSE	Social Security Number	The code followed by a slash, '/' must be followed by the ISO country code, a slash, '/' and the Social Security Number.
TXID	Tax Identification Number	The code followed by a slash, '/' must be followed by the ISO country code, a slash, '/' and the Tax Identification Number.

CODES

In option F, when Name and Address is present, Number must contain one of the following numbers (Error code(s): T56):

1	Name of the Ordering Customer	The number followed by a slash, '/' must be followed by the name of the ordering customer (where it is recommended that the surname precedes given name(s)).
2	Address Line	The number followed by a slash, '/' must be followed by an Address Line (Address Line can be used to provide for example, street name and number, or building name).
3	Country and Town	The number followed by a slash, '/' must be followed by the ISO country code, a slash '/' and Town (Town can be complemented by postal code (for example zip), country subdivision (for example state, province, or county).
4	Date of Birth	The number followed by a slash, '/' must be followed by the Date of Birth in the YYYYMMDD format.
5	Place of Birth	The number followed by a slash, '/' must be followed by the ISO country code, a slash '/' and the Place of Birth.
6	Customer Identification Number	The number followed by a slash, '/' must be followed by the ISO country code of the issuer of the number, a slash '/', the issuer of the number, a slash '/' and the Customer Identification Number.
7	National Identity Number	The number followed by a slash, '/' must be followed by the ISO country code, a slash '/' and the National Identity Number.
8	Additional Information	<p>The number followed by a slash, '/' is followed by information completing one of the following:</p> <ul style="list-style-type: none"> • the Identifier provided in subfield 1 (Party Identifier) used with the (Code)(Country Code)(Identifier) format. • the Customer Identification Number provided in subfield 2 (Name and Address) with number 6. • the National Identity Number provided in subfield 2 (Name and Address) with number 7.

NETWORK VALIDATED RULES

Identifier Code must be a registered BIC (Error code(s): T27,T28,T29,T45).

In option F, subfield 1 (Party Identifier) used with the (Code)(Country Code)(Identifier) format: Country Code must be a valid ISO country code (Error code(s): T73).

In option F, subfield 2 (Name and Address):

- The first line must start with number 1 (Error code(s): T56).
- Numbers must appear in numerical order (Error code(s): T56).
- Number 2 must not be used without number 3 (Error code(s): T56).
- Number 4 must not be used without number 5 and vice versa (Error code(s): T56).
- Number 4 must be followed by a valid date in the format YYYYMMDD and this date, local to the sender, must not be later than the date on which the message is successfully sent to SWIFT (Error code(s): T50).
- Numbers 3, 5, 6 and 7 must be followed by a valid ISO country code (Error code(s): T73), a slash '/' and additional Details (Error code(s): T56).
- Numbers 3, 4, 5, 6, 7 and 8 must not be repeated (Error code(s): T56).

- The use of number 8 is only allowed in the following instances (Error code(s): T56):
 - to continue information on the Identifier of the ordering customer provided in subfield 1 (Party Identifier) used with the (Code)(Country Code)(Identifier) format.
 - to continue information on the Customer Identification Number provided in subfield 2 (Name and Address) following number 6.
 - to continue information on the National Identity Number provided in subfield 2 (Name and Address) following number 7.

USAGE RULES

If the account number is present, it must be stated in Account.

When option A is used, this field can only contain a financial institution BIC if the message that caused the credit is a Category 1 message and a financial institution BIC was present in 50A Ordering Customer.

In option F, subfield 2 (Name and Address): Numbers 1 and 2 may be repeated.

In option F, subfield 1 (Party Identifier) used with the (Code)(Country Code)(Identifier) format: if additional space is required for providing the Identifier of the ordering customer, one of the following options must be used:

1. First option (preferred): Identify the ordering customer with a different identifier where the length is not an issue.
2. Second option: Continue the information in subfield 2 (Name and Address) using number 8.

In option F, subfield 2 (Name and Address): if additional space is required for providing the Customer Identification Number (number 6) or the National Identity Number (number 7) of the ordering customer, one of the following options must be used:

1. First option (preferred): Identify the ordering customer with a different identifier where the length is not an issue.
2. Second option: Continue the information in subfield 2 (Name and Address) using number 8.

EXAMPLE

Option F - Example 1

```
:50F:/12345678
1/SMITH JOHN
2/299, PARK AVENUE
3/US/NEW YORK, NY 10017
```

Option F - Example 2

```
:50F:/BE30001216371411
1/PHILIPS MARK
4/19720830
5/BE/BRUSSELS
```

Option F - Example 3

```
:50F:DRLC/BE/BRUSSELS/NB0949042
1/DUPONT JACQUES
2/HIGH STREET 6, APT 6C
3/BE/BRUSSELS
```

Option F - Example 4

:50F:NIDN/DE/121231234342
 1/MANN GEORG
 6/DE/ABC BANK/1234578293

Option F - Example 5

:50F:CUST/DE/ABC BANK/123456789/8-123456
 1/MANN GEORG
 2/LOW STREET 7
 3/DE/FRANKFURT
 8/7890

This means that the customer identification number of Mann Georg assigned by ABC Bank is 123456789/8-1234567890.

6. Field 52a: Ordering Institution**FORMAT**

Option A	[/1!a][34x] 4!a2!a2!c[3!c]	(Party Identifier) (Identifier Code)
Option D	[/1!a][34x] 4*35x	(Party Identifier) (Name and Address)

PRESENCE

Conditional (see rule C1)

DEFINITION

This field identifies the financial institution which originated the transaction resulting in this credit.

CODES

In option A, Party Identifier may be used to indicate a national clearing system code.

The following codes may be used, preceded by a double slash '//':

AT	5!n	Austrian Bankleitzahl
AU	6!n	Australian Bank State Branch (BSB) Code
BL	8!n	German Bankleitzahl
CC	9!n	Canadian Payments Association Payment Routing Number
ES	8..9n	Spanish Domestic Interbanking Code
FW	without 9 digit code	Pay by Fedwire
GR	7!n	HEBIC (Hellenic Bank Identification Code)
HK	3!n	Bank Code of Hong Kong
IE	6!n	Irish National Clearing Code (NSC)
IN	11!c	Indian Financial System Code (IFSC)

IT	10!n	Italian Domestic Identification Code
PL	8!n	Polish National Clearing Code (KNR)
PT	8!n	Portuguese National Clearing Code
SC	6!n	UK Domestic Sort Code

CODES

In option D, Party Identifier may be used to indicate a national clearing system code.

The following codes may be used, preceded by a double slash '//':

AT	5!n	Austrian Bankleitzahl
AU	6!n	Australian Bank State Branch (BSB) Code
BL	8!n	German Bankleitzahl
CC	9!n	Canadian Payments Association Payment Routing Number
CH	6!n	CHIPS Universal Identifier
CP	4!n	CHIPS Participant Identifier
ES	8..9n	Spanish Domestic Interbanking Code
FW	9!n	Fedwire Routing Number
GR	7!n	HEBIC (Hellenic Bank Identification Code)
HK	3!n	Bank Code of Hong Kong
IE	6!n	Irish National Clearing Code (NSC)
IN	11!c	Indian Financial System Code (IFSC)
IT	10!n	Italian Domestic Identification Code
PL	8!n	Polish National Clearing Code (KNR)
PT	8!n	Portuguese National Clearing Code
RU	9!n	Russian Central Bank Identification Code
SC	6!n	UK Domestic Sort Code
SW	3..5n	Swiss Clearing Code (BC code)
SW	6!n	Swiss Clearing Code (SIC code)

NETWORK VALIDATED RULES

Identifier Code must be a registered financial institution BIC (Error code(s): T27,T28,T29,T45).

Identifier Code must be a financial institution BIC. This error code applies to all types of BICs referenced in a FIN message including SWIFT BICs, non-SWIFT BICs, Masters, Synonyms, Live destinations and Test & Training destinations (Error code(s): C05).

USAGE RULES

The coded information contained in field 52a must be meaningful to the Receiver of the message.

Option A is the preferred option.

Option D should only be used when the ordering financial institution has no BIC.

7. Field 56a: Intermediary

FORMAT

Option A	[/1!a]/[34x] 4!a2!a2!c[3!c]	(Party Identifier) (Identifier Code)
Option D	[/1!a]/[34x] 4*35x	(Party Identifier) (Name and Address)

PRESENCE

Optional

DEFINITION

This field identifies the financial institution from which the Sender received the funds, when other than the ordering institution.

NETWORK VALIDATED RULES

Identifier Code must be a registered financial institution BIC (Error code(s): T27,T28,T29,T45).

Identifier Code must be a financial institution BIC. This error code applies to all types of BICs referenced in a FIN message including SWIFT BICs, non-SWIFT BICs, Masters, Synonyms, Live destinations and Test & Training destinations (Error code(s): C05).

8. Field 72: Sender to Receiver Information

FORMAT

6*35x (Narrative)

In addition to narrative text, structured text with the following line formats may be used:

Line 1	/8c/[additional information]	(Code)(Narrative)
Lines 2-6	[/continuation of additional information]	(Narrative)
	or	or
	[/8c/[additional information]]	(Code)(Narrative)

PRESENCE

Optional

DEFINITION

This field contains additional information for the Receiver.

USAGE RULES

This field may contain information only, that is, no instructions may be included.

The structured format may be used for bilaterally agreed codes.

Additional explanatory information, which may be continued on the next lines, is preceded by a double slash '//'.
 '//'.

This field may contain ERI to transport dual currencies, as explained in the chapter 'Euro - Impact on Category 9 Message Standards'.

In order to comply with the EC-directive on cross border credit transfers, the optional code word EXCH may be used to transport an exchange rate. In line with ERI, the code word EXCH is placed between slashes, followed by the exchange rate, format 12d, and terminated with another slash.

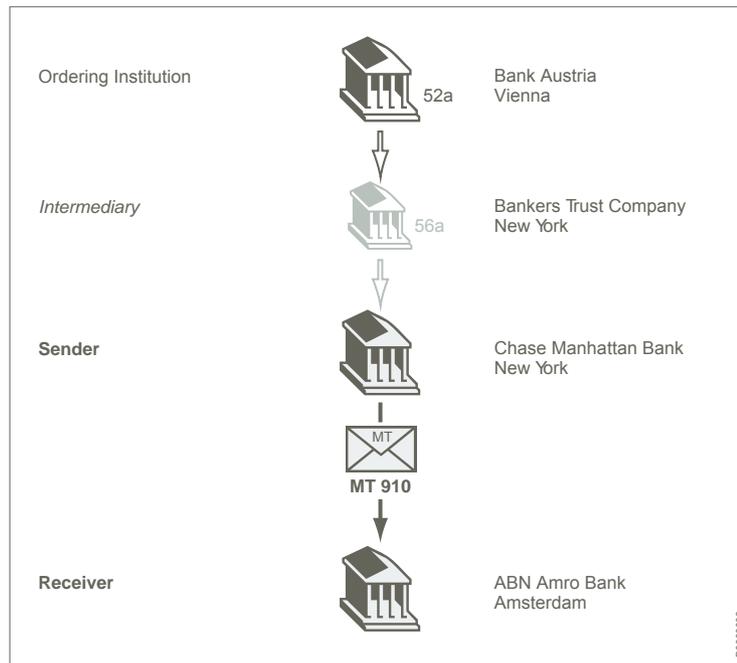

MT 910 Examples

Narrative

Chase Manhattan Bank, New York, informs ABN Amro Bank, Amsterdam, of a credit to its account number 6-9412771, by order of Bank Austria, Vienna. The value date of the credit is 23 January 2009, for US dollars 500,000, and is received from Bankers Trust Company, New York.

Chase Manhattan sends the following confirmation to ABN Amro:

MT 920 Request Message

Note: As this message may require the implementation of special procedures, its use is governed by bilateral agreements between correspondents.

MT 920 Scope

This multiple message is sent by an account owner, or a financial institution (concentrating institution) acting on behalf of an account owner, to an account servicing institution.

It is used to request the account servicing institution to transmit one or more MT 940 Customer Statement(s), MT 941 Balance Report(s), MT 942 Interim Transaction Report(s), or MT 950 Statement Message(s) containing the latest information available for the account(s) identified in the message.

MT 920 Format Specifications

MT 920 Request Message

Status	Tag	Field Name	Content/Options	No.
M	20	Transaction Reference Number	16x	1
----->				
M	12	Message Requested	3!n	2
M	25	Account Identification	35x	3
O	34F	Debit/(Debit and Credit) Floor Limit Indicator	3!a[1!a]15d	4
O	34F	Credit Floor Limit Indicator	3!a[1!a]15d	5

M = Mandatory, O = Optional				

MT 920 Network Validated Rules

- C1** If field 12 contains the value '942', at least field 34F Debit/(Debit and Credit) Floor Limit Indicator must be present in the same repetitive sequence (Error code(s): C22).
- C2** Within each repetitive sequence, when only one field 34F is present, the second subfield must not be used. When both fields 34F are present, subfield 2 of the first 34F must contain the value 'D', and subfield 2 of the second 34F must contain the value 'C' (Error code(s): C23).
- C3** The currency code must be the same for each occurrence of field 34F within each repetitive sequence (Error code(s): C40).

MT 920 Usage Rules

This message should only be used if the account owner(s) have authorised the financial institutions to transmit such information and according to agreed criteria.

MT 920 Field Specifications

1. Field 20: Transaction Reference Number

FORMAT

16x

PRESENCE

Mandatory

DEFINITION

This field specifies the reference assigned by the Sender to unambiguously identify the message.

NETWORK VALIDATED RULES

This field must not start or end with a slash '/' and must not contain two consecutive slashes '/' (Error code(s): T26).

2. Field 12: Message Requested

FORMAT

3!n

PRESENCE

Mandatory

DEFINITION

This field identifies the message type which is being requested.

CODES

This field must contain one of the following message type numbers (Error code(s): T88):

940	Customer Statement
941	Balance Report
942	Interim Transaction Report
950	Statement Message

3. Field 25: Account Identification

FORMAT

35x

PRESENCE

Mandatory

DEFINITION

This field identifies the account for which the information is requested.

4. Field 34F: Debit/(Debit and Credit) Floor Limit Indicator

FORMAT

Option F 3!a[1!a]15d (Currency)(D/C Mark)(Amount)

PRESENCE

Conditional (see rule C1)

DEFINITION

This field specifies the minimum value (transaction amount) to be reported on the requested message.

CODES

When D/C Mark is present, it must contain the following code (Error code(s): T51):

D	Debit	Debit floor limit.
---	-------	--------------------

NETWORK VALIDATED RULES

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03,T40,T43).

USAGE RULES

When field 34F Debit/(Debit and Credit) Floor Limit Indicator is present without field 34F Credit Floor Limit Indicator, the floor limit applies to both debit and credit amounts. When different limits apply, both fields 34F must be present.

5. Field 34F: Credit Floor Limit Indicator

FORMAT

Option F 3!a[1!a]15d (Currency)(D/C Mark)(Amount)

PRESENCE

Conditional (see rule C2)

DEFINITION

This field specifies the minimum value (transaction amount) to be reported on the requested message.

CODES

D/C Mark must contain the following code (Error code(s): T51):

C	Credit	Credit floor limit.
---	--------	---------------------

NETWORK VALIDATED RULES

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03,T40,T43).

USAGE RULES

When different limits apply, this field 34F must be present, with a credit indicator ('C').

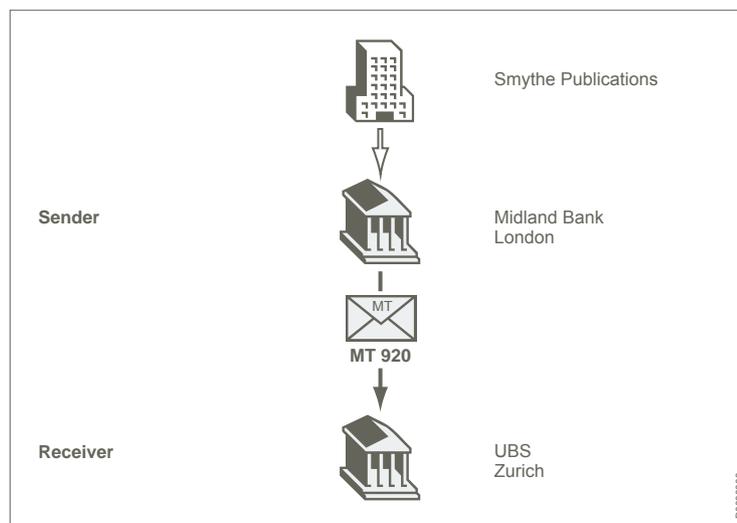

MT 920 Examples

Narrative

Midland Bank, London, requests UBS, Zürich, to provide an interim transaction report for account number 123-45678, which is owned by Smythe Publications.

The report is to list all debit amounts in excess of Swiss Francs 1,000,000 and all credit amounts in excess of Swiss Francs 100,000.

MT 935 Rate Change Advice

MT 935 Scope

This multiple message is used by the Sender to advise interest rate change(s) to the Receiver.

It is used to advise the details of:

- General interest rate change(s).
- Interest rate change(s) which apply to specific account(s), other than call/notice loan/deposit account(s), serviced by the Sender of the message for the Receiver.

Interest rate change(s) that can be advised by this message type include: NOTICE, CALL, PRIME, COMMERCIAL, BASE, CURRENT and DEPOSIT.

MT 935 Format Specifications

MT 935 Rate Change Advice

MT 935 Network Validated Rules

- C1** The repetitive sequence must appear at least once, but not more than ten times (Error code(s): T10).
- C2** Either field 23 or field 25, but not both, must be present in any repetitive sequence (Error code(s): C83).

MT 935 Field Specifications

1. Field 20: Transaction Reference Number

FORMAT

16x

PRESENCE

Mandatory

DEFINITION

This field specifies the reference assigned by the Sender to unambiguously identify the message.

NETWORK VALIDATED RULES

This field must not start or end with a slash '/' and must not contain two consecutive slashes '/' (Error code(s): T26).

2. Field 23: Further Identification

FORMAT

16x

The format is structured as:

3!a[2!n]11x

(Currency)(Number of Days)(Function)

PRESENCE

Conditional (see rule C2)

DEFINITION

This field specifies the kind of interest rate being advised, in those cases where it is not related to a specific account.

CODES

Function must contain one of the following codes identifying the function of the message:

BASE	Base rate	Used to advise a change in the base rate.
CALL	Call rate	Used to advise a change in the call rate.
COMMERCIAL	Commercial rate	Used to advise a change in the commercial rate.
CURRENT	Current accounts	Used to advise a change in the interest rate applicable to current accounts.
DEPOSIT	Deposits	Used to advise a change in the interest rate applicable to deposits.

NOTICE	Notice	Used to advise a change in the notice rate.
PRIME	Used to advise a change in the prime rate	

USAGE RULES

Currency specifies the currency that applies to the rate.

Number of Days specifies the number of days notice (for example, 07). It must only be used when Function is NOTICE.

3. Field 25: Account Identification

FORMAT

35x

PRESENCE

Conditional (see rule C2)

DEFINITION

This field identifies the relevant account, where the rate change relates to a specific account serviced by the Sender for the Receiver.

4. Field 30: Effective Date of New Rate

FORMAT

6!n (Date)

PRESENCE

Mandatory

DEFINITION

This field specifies the effective date of the rate being advised.

NETWORK VALIDATED RULES

Date must be a valid date expressed as YYYYMMDD (Error code(s): T50).

5. Field 37H: New Interest Rate

FORMAT

Option H 1!a12d (Indicator)(Rate)

PRESENCE

Mandatory

DEFINITION

This field specifies the new interest rate being advised.

CODES

Indicator must contain one of the following codes (Error code(s): T51):

C	Credit	The new interest rate is a credit rate.
D	Debit	The new interest rate is a debit rate.

NETWORK VALIDATED RULES

The integer part of Rate must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length (Error code(s): T40,T43).

USAGE RULES

This field may be repeated, if required.

Rate specifies the rate in decimal comma format.

6. Field 72: Sender to Receiver Information

FORMAT

6*35x (Narrative)

In addition to narrative text, structured text with the following line formats may be used:

Line 1	/8c/[additional information]	(Code)(Narrative)
Lines 2-6	[/continuation of additional information]	(Narrative)
	or	or
	[/8c/[additional information]]	(Code)(Narrative)

PRESENCE

Optional

DEFINITION

This field contains additional information for the Receiver.

USAGE RULES

The structured format may be used for bilaterally agreed codes.

Additional explanatory information, which may be continued on the next lines, is preceded by a double slash '//'.
 '//'

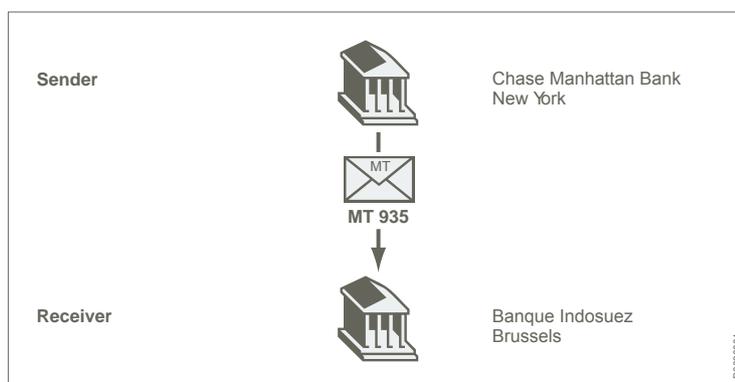

MT 935 Examples

Narrative

On 20 January 2009 Chase Manhattan Bank, New York advises all financial institutions to which it has given short term USD Floating Prime advances, of the new rate applicable, starting 22 January 2009.

One of these financial institutions is Banque Indosuez, Brussels.

MT 940 Customer Statement Message

Note: As this message may require the implementation of special procedures, its use is governed by bilateral agreements between correspondents.

MT 940 Scope

This message type is:

- sent by an account servicing institution (reporting institution) to a financial institution (concentrating institution), which has been authorised by the account owner to receive it.
- sent by an account servicing institution (reporting institution) to a financial institution account owner.
- sent by an account servicing institution to a non-financial institution account owner or party authorised by the account owner to receive the information.
- sent by a concentrating institution to a non-financial institution account owner or party authorised by the account owner to receive the information.

It is used to transmit detailed information about all entries booked to the account.

For use of messages in the corporate to bank environment, see the MT message implementation guide for corporate customers available on www.swift.com.

MT 940 Format Specifications

MT 940 Customer Statement Message

Status	Tag	Field Name	Content/Options	No.
M	20	Transaction Reference Number	16x	1
O	21	Related Reference	16x	2
M	25	Account Identification	35x	3
M	28C	Statement Number/Sequence Number	5n[/5n]	4
M	60a	Opening Balance	F or M	5
----->				
O	61	Statement Line	6!n[4!n]2a[1!a]15d1!a3!c16x[//16x] [34x]	6
O	86	Information to Account Owner	6*65x	7

M	62a	Closing Balance (Booked Funds)	F or M	8
O	64	Closing Available Balance (Available Funds)	1!a6!n3!a15d	9
----->				
O	65	Forward Available Balance	1!a6!n3!a15d	10

Status	Tag	Field Name	Content/Options	No.
O	86	Information to Account Owner	6*65x	11
M = Mandatory, O = Optional				

MT 940 Network Validated Rules

- C1** If field 86 is present in any occurrence of the repetitive sequence, it must be preceded by a field 61. In addition, if field 86 is present, it must be present on the same page (message) of the statement as the related field 61 (Error code(s): C24).
- C2** The first two characters of the three character currency code in fields 60a, 62a, 64 and 65 must be the same for all occurrences of these fields (Error code(s): C27).

MT 940 Usage Rules

- This message should only be used if the account owner(s) have authorised the financial institutions to transmit such information. It must be used according to agreed criteria.
- Financial institutions which receive this message must not use the information for their own purposes.
- It is important that amounts be identical to those of the original transaction. For identification purposes, deductions, for example, charges above and beyond those previously accounted for, shall appear separately with the appropriate code. They shall use the same TRN as the original transaction, or other suitable reference if no TRN is available.
- Since the length of a SWIFT message is restricted to the maximum input message length, several messages may be required to accommodate all the information for one statement.

MT 940 Field Specifications

1. Field 20: Transaction Reference Number

FORMAT

16x

PRESENCE

Mandatory

DEFINITION

This field specifies the reference assigned by the Sender to unambiguously identify the message.

NETWORK VALIDATED RULES

This field must not start or end with a slash '/' and must not contain two consecutive slashes '/' (Error code(s): T26).

USAGE RULES

The TRN may be the same or different for the separate messages of a statement consisting of several messages.

2. Field 21: Related Reference

FORMAT

16x

PRESENCE

Optional

DEFINITION

If the MT 940 is sent in response to an MT 920 Request Message, this field must contain the field 20 Transaction Reference Number of the request message.

NETWORK VALIDATED RULES

This field must not start or end with a slash '/' and must not contain two consecutive slashes '/' (Error code(s): T26).

3. Field 25: Account Identification

FORMAT

35x (Account)

PRESENCE

Mandatory

DEFINITION

This field identifies the account for which the statement is sent.

4. Field 28C: Statement Number/Sequence Number

FORMAT

Option C 5n[/5n] (Statement Number)(Sequence Number)

PRESENCE

Mandatory

DEFINITION

This field contains the sequential number of the statement, optionally followed by the sequence number of the message within that statement when more than one message is sent for one statement.

USAGE RULES

The statement number should be reset to 1 on 1 January of each year.

If used, the sequence number always starts with 1. When several messages are sent to convey information about a single statement, the first message must contain '1' in Sequence Number.

The sequence number must be incremented by one for each additional message.

Both the statement number and sequence number enable the Receiver to put the different messages into sequence and thus form the complete statement.

EXAMPLE

The first message of a statement is :28C:235/1

The second message is :28C:235/2 and so on.

5. Field 60a: Opening Balance

FORMAT

Option F	1!a6!n3!a15d	(D/C Mark)(Date)(Currency)(Amount)
Option M	1!a6!n3!a15d	(D/C Mark)(Date)(Currency)(Amount)

PRESENCE

Mandatory

DEFINITION

This field specifies, for the (intermediate) opening balance, whether it is a debit or credit balance, the date, the currency and the amount of the balance.

CODES

In option F, or M, D/C Mark must contain one of the following codes (Error code(s): T51):

C	Credit	The (intermediate) opening balance is a credit balance.
D	Debit	The (intermediate) opening balance is a debit balance.

NETWORK VALIDATED RULES

Date must be a valid date expressed as YYMMDD (Error code(s): T50).

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for that specific currency as specified in ISO 4217 (Error code(s): C03,T40,T43).

USAGE RULES

The D/C Mark, Currency and Amount in this field must always be the same as the D/C Mark, Currency and Amount in field 62a (closing balance) of the previous customer statement message for this account.

The first customer statement message for a specified period must contain field 60F (first opening balance); additional statement messages for the same statement period must contain field 60M (intermediate opening balance).

6. Field 61: Statement Line

FORMAT

6!n[4!n]2a[1!a]15d1!a3!c16x[//16x]
[34x]

where subfields are:

Subfield	Format	Name
1	6!n	(Value Date)
2	[4!n]	(Entry Date)
3	2a	(Debit/Credit Mark)
4	[1!a]	(Funds Code)
5	15d	(Amount)
6	1!a3!c	(Transaction Type)(Identification Code)
7	16x	(Reference for the Account Owner)
8	[//16x]	(Reference of the Account Servicing Institution)
9	[34x]	(Supplementary Details)

PRESENCE

Optional

DEFINITION

This field contains the details of each transaction.

CODES

Subfield 3 Debit/Credit Mark must contain one of the following codes (Error code(s): T51):

C	Credit
D	Debit
RC	Reversal of Credit (debit entry)
RD	Reversal of Debit (credit entry)

CODES

In subfield 6, Transaction Type must contain one of the following codes (Error code(s): T53):

S	SWIFT transfer	For entries related to SWIFT transfer instructions and subsequent charge messages.
---	----------------	--

N	Non-SWIFT transfer	For entries related to payment and transfer instructions, including related charges messages, not sent through SWIFT or where an alpha description is preferred.
F	First advice	For entries being first advised by the statement (items originated by the account servicing institution).

CODES

In subfield 6, when Transaction Type is 'S', Identification Code will indicate the message type of the SWIFT message causing the entry (for debit entries) or the message type of the SWIFT message used to advise the account owner (for credit entries). It must be a number (format 3!n) in the range 100-999 (Error code(s): T18).

CODES

In subfield 6, when Transaction Type is 'N' or 'F', Identification Code may contain one of the following codes:

BNK	Securities Related Item - Bank Fees
BOE	Bill of Exchange
BRF	Brokerage Fee
CAR	Securities Related Item - Corporate Actions Related (should only be used when no specific corporate action event code is available)
CAS	Securities Related Item - Cash in Lieu
CHG	Charges and Other Expenses
CHK	Cheques
CLR	Cash Letters/ Cheques Remittance
CMI	Cash Management Item - No Detail
CMN	Cash Management Item - Notional Pooling
CMP	Compensation Claims
CMS	Cash Management Item - Sweeping
CMT	Cash Management Item - Topping

CMZ	Cash Management Item - Zero Balancing	
COL	Collections (used when entering a principal amount)	
COM	Commission	
CPN	Coupons	Securities Related Item - Coupon Payments.
DCR	Documentary Credit (used when entering a principal amount)	
DDT	Direct Debit Item	
DIS	Securities Related Item - Gains Disbursement	
DIV	Dividends	Securities Related Item - Dividends.
EQA	Equivalent Amount	
EXT	Securities Related Item - External Transfer for Own Account	
FEX	Foreign Exchange	
INT	Interest	Interest related amount.
LBX	Lock Box	
LDP	Loan Deposit	
MAR	Securities Related Item - Margin Payments/Receipts	
MAT	Securities Related Item - Maturity	
MGT	Management fees	Securities Related Item - Management Fees.
MSC	Miscellaneous	
NWI	Securities Related Item - New Issues Distribution	
ODC	Overdraft Charge	
OPT	Securities Related Item - Options	
PCH	Purchase	Securities Related Item - Purchase (including STIF and Time deposits).
POP	Securities Related Item - Pair-off Proceeds	

PRN	Securities Related Item - Principal Pay-down/Pay-up	
REC	Reclaim	Securities Related Item - Tax Reclaim.
RED	Securities Related Item - Redemption/ Withdrawal	
RIG	Securities Related Item - Rights	
RTI	Returned Item	
SAL	Sale	Securities Related Item - Sale (including STIF and Time deposits).
SEC	Securities	Securities (used when entering a principal amount).
SLE	Securities Related Item - Securities Lending Related	
STO	Standing Order	
STP	Securities Related Item - Stamp Duty	
SUB	Securities Related Item - Subscription	
SWP	Securities Related Item - SWAP Payment	
TAX	Securities Related Item - Withholding Tax Payment	
TCK	Travellers Cheques	
TCM	Securities Related Item - Tripartite Collateral Management	
TRA	Securities Related Item - Internal Transfer for Own Account	
TRF	Transfer	
TRN	Securities Related Item - Transaction Fee	
UWC	Securities Related Item - Underwriting Commission	

VDA	Value Date Adjustment (used with an entry made to withdraw an incorrectly dated entry - it will be followed by the correct entry with the relevant code)
WAR	Securities Related Item - Warrant

NETWORK VALIDATED RULES

Subfield 1, **Value Date**, must be a valid date expressed as YYMMDD (Error code(s): T50).

The SWIFT System validates subfield 2, **Entry Date** (Date in reduced ISO form), using current System Year (Error code(s): T50).

The integer part of subfield 5, Amount, must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length (Error code(s): T40,T43).

USAGE RULES

This field may be repeated within the constraints of the maximum input message length.

'Original' advice for charges, that is, the first time the account owner is informed of a charge, must be identified in subfield 6, with the **Transaction Type** 'F' and the **Identification Code** 'CHG'.

The following rules apply to subfield 7, **Reference for the Account Owner**:

- At least one valid character other than a blank must be present.
- For debit entries, the purpose of this subfield is to identify, to the account owner, the instruction which caused the debit. Therefore, the content of this subfield is the field 20 Sender's Transaction Reference Number (or its equivalent) of the original instruction.
- Credit entries may be the result of one of the following situations:
 1. The account servicing institution is identifying, to the account owner the receipt of funds for its account as a result of a related transaction. In this case, the content of subfield 7, Reference for the Account Owner is the reference for the beneficiary (for example, field 21 Related Reference) of the related transaction.
 2. The account servicing institution has issued a payment instruction to the account owner and the credit identified in this subfield is for that payment. The content of subfield 7, Reference for the Account Owner is the field 20 Transaction Reference Number (or its equivalent) of the payment instruction issued by the account servicing institution.
- If no reference is available for this subfield, the code NONREF shall be used. The account servicing institution must then supply, in subfield 9, **Supplementary Details**, what it considers to be the best alternative information.
- This reference must be quoted in all cases when available. In cases where a transaction passes through several financial institutions, the original reference must always be forwarded.
- This reference must always be quoted against any charges or fees debited by the account servicing institution.
- Debits against standing instructions must show the reference of the standing instruction.

- In cases where a mutually agreed alternative reference exists (for example, in foreign exchange or money market transactions), this reference should then be used.
- If the statement entry concerns a cheque, the cheque number should be indicated in this subfield.

The following rules apply to subfield 8, **Reference of the Account Servicing Institution**:

- The content of this subfield is the account servicing institution's own reference for the transaction.
- When the transaction has been initiated by the account servicing institution, this reference may be identical to subfield 7, Reference for the Account Owner. If this is the case, Reference of the Account Servicing Institution, subfield 8 may be omitted.

The following rules apply to subfield 9, **Supplementary Details**:

- When no reference for the account owner is available, that is, subfield 7, Reference for the Account Owner, contains NONREF, the account servicing institution should provide the best available alternative information in this subfield.
- Supplementary details may be provided when an advice has not been sent for a transaction, or to provide additional information to facilitate reconciliation.
- This field may contain ERI to transport dual currencies, as explained in the chapter 'Euro - Impact on Category 9 Message Standards'.
- In order to comply with the EC-directive on cross border credit transfers, the optional code word EXCH may be used to transport an exchange rate. In line with ERI, the code word EXCH is placed between slashes, followed by the exchange rate, format 12d, and terminated with another slash.

EXAMPLE

(1) :61:0901230122C3500,25FCHK304955//4958843

(2) :61:0901230122C3500,25FCHK304955//4958843
ADDITIONAL INFORMATION

7. Field 86: Information to Account Owner

FORMAT

6*65x (Narrative)

PRESENCE

Conditional (see rule C1)

DEFINITION

This field contains additional information about the transaction detailed in the preceding statement line and which is to be passed on to the account owner.

USAGE RULES

This field may contain ERI to transport dual currencies, as explained in the chapter 'Euro - Impact on Category 9 Message Standards'.

Since the charges field in the customer transfers is repetitive, it may be necessary to report more than one charges amount in the resulting statement. In this case, it is allowed to repeat the code word CHGS before the code word OCMT. The order in which the charges are specified is the same as in the customer transfers, that

is, the order in which the charges have been taken during the transaction. So, the last appearance of the code word CHGS always specifies the charges (if any) of the account servicing institution.

In order to comply with the EC-directive on cross border credit transfers, the optional code word EXCH may be used to transport an exchange rate. In line with ERI, the code word EXCH is placed between slashes, followed by the exchange rate, format 12d, and terminated with another slash. The code may be repeated if the account servicing institution wants to report an exchange rate that it applied, in addition to the exchange rate received in the instruction. The order in which the exchange rates are specified is the same as the order in which the rates have been applied during the transaction. So, the last appearance of the code word EXCH always specifies the rate applied by the account servicing institution.

An ordering party is identified with the preceding code /ORDP/. The information following this code is copied from field 50a of the customer payment order, or field 52a (sender if field 52a is not present) of the financial institution transfer. The code should be used at the beginning of a line.

In case of a debit item, a beneficiary party may be identified with the preceding code /BENM/. The information following this code is copied from field 59a of the customer payment order, or field 58a of the financial institution transfer. The code should be used at the beginning of a line.

In case remittance information from field 70 of the payment instruction is to be included in this field, it should be preceded by the code /REMI/.

In case the information in field 72 of the payment instruction is intended for the account owner, it should be copied into field 86 as it is. Codes used in field 72 of the payment instruction have therefore the same meaning in field 86 of the statement. If only free text is used in field 72, it is to be copied as it is since a code in field 86 will not add any value.

8. Field 62a: Closing Balance (Booked Funds)

FORMAT

Option F	1!a6!n3!a15d	(D/C Mark)(Date)(Currency)(Amount)
Option M	1!a6!n3!a15d	(D/C Mark)(Date)(Currency)(Amount)

PRESENCE

Mandatory

DEFINITION

This field specifies, for the (intermediate) closing balance, whether it is a debit or credit balance, the date, the currency and the amount of the balance.

CODES

In option F, or M, D/C Mark must contain one of the following codes (Error code(s): T51):

C	Credit	The (intermediate) closing balance is a credit balance.
D	Debit	The (intermediate) closing balance is a debit balance.

NETWORK VALIDATED RULES

Date must be a valid date expressed as YYMMDD (Error code(s): T50).

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for that specific currency as specified in ISO 4217 (Error code(s): C03,T40,T43).

USAGE RULES

The D/C Mark, Currency and Amount in this field must always be the same as the D/C Mark, Currency and Amount in field 60a (opening balance) of the subsequent customer statement message for this account.

If there is only one customer statement message transmitted for the period, this field must use tag option F, that is, 62F (final closing balance). When several messages are transmitted for the same statement period, all messages except the last message must contain field 62M (intermediate closing balance); the last message of the statement must contain field 62F.

9. Field 64: Closing Available Balance (Available Funds)

FORMAT

1!a6!n3!a15d (D/C Mark)(Date)(Currency)(Amount)

PRESENCE

Optional

DEFINITION

This field indicates the funds which are available to the account owner (if credit balance) or the balance which is subject to interest charges (if debit balance).

CODES

D/C Mark must contain one of the following codes (Error code(s): T51):

C	Credit	The closing available balance is a credit balance.
D	Debit	The closing available balance is a debit balance.

NETWORK VALIDATED RULES

Date must be a valid date expressed as YYMMDD (Error code(s): T50).

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for that specific currency as specified in ISO 4217 (Error code(s): C03,T40,T43).

10. Field 65: Forward Available Balance

FORMAT

1!a6!n3!a15d (D/C Mark)(Date)(Currency)(Amount)

PRESENCE

Optional

DEFINITION

This field indicates the funds which are available to the account owner (if a credit or debit balance) for the specified forward value date.

CODES

D/C Mark must contain one of the following codes (Error code(s): T51):

C	Credit	The forward available balance is a credit balance.
D	Debit	The forward available balance is a debit balance.

NETWORK VALIDATED RULES

Date must be a valid date expressed as YYMMDD (Error code(s): T50).

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for that specific currency as specified in ISO 4217 (Error code(s): C03,T40,T43).

USAGE RULES

When there is more than one value date for the items booked to the account (in this or previous statement periods), this field will indicate the balance which will be available to the account owner on the date(s) indicated.

11. Field 86: Information to Account Owner

FORMAT

6*65x (Narrative)

PRESENCE

Optional

DEFINITION

This field contains additional information about the statement as a whole. It is to be passed on to the account owner.

MT 940 Examples

Example 1: Statement

Narrative

Chase Manhattan Bank, New York, sends an MT 940 to Midland Bank, London, for account number 123-304958, of Transglobal Corp. The statement number is 123.

Closing Balance of Previous Statement (22 January 2009): USD 395,212,311.71 (Credit)

Opening Balance as of 23 January 2009: USD 395,212,311.71 (Credit)

Transaction Details:

(1) Value date: 23 January 2009 Credit: USD 50,000,000

Transaction type: non-SWIFT transfer
Reference for the Account Owner: None
Chase Manhattan Bank's Reference: 8951234
Details: Ordering Institution = Bk of NYC Western Cash Reserve

(2) Value date: 26 January 2009 Credit: USD 5,700,000

Transaction type: Settlement of F/X Contract
Reference for the Account Owner: 036960
Chase Manhattan Bank's Reference: 8954321

(3) Value Date: 27 January 2009 Credit: USD 200,000

Transaction Type: Dividend
Reference for the Account Owner: None
Chase Manhattan Bank's Reference: 8846543
Information for the Account Owner: Dividend Loral Corp Preferred stock 1st quarter 2009

Closing Book Balance as of 23 January 2009: USD 451,112,311.71 (Credit)

Closing Available Balance: USD 445,212,311.71 (Credit)

Forward Available Balance:

As of 26 January 2009: USD 450,912,311.71 (Credit)

As of 27 January 2009: USD 451,112,311.71 (Credit)

General information: Prime rate as of today 11 pct

On 24 January 2009, Chase Manhattan Bank, New York, sends another MT 940 to Midland Bank, London, for account number 123-304958, of Transglobal Corp. This statement number is 124.

Opening Balance as of 24 January 2009: USD 451,112,311.71 (Credit)

Transaction Details:

(1) Value date: 24 January 2009 Debit: USD 10,000,000

Transaction type: SWIFT MT 202
Reference for the Account Owner: DRS/06553

Closing Book Balance as of 24 January 2009: USD 441,112,311.71 (Credit)

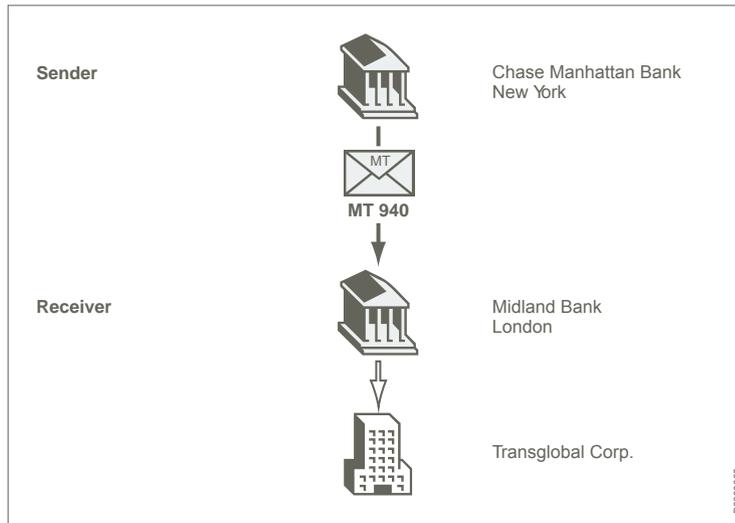

Closing Available Balance: USD 435,212,311.71 (Credit)

Forward Available Balance:

As of 26 January 2009: USD 440,912,311.71 (Credit)

As of 27 January 2009: USD 441,112,311.71 (Credit)

Example 2: Concentrating Institution**Narrative**

A corporate customer owns an account with its local bank and also owns accounts with 4 different banks outside its own country. The corporate customer asks its local bank to receive statement messages from the 4 international banks on its behalf. The local bank acts as a concentrating institution, receiving the statement messages and passing them on to the corporate customer.

Information Flow

MT 941 Balance Report

Note: As this message may require the implementation of special procedures, its use is governed by bilateral agreements between correspondents.

MT 941 Scope

This message type is:

- sent by an account servicing institution (reporting institution) to a financial institution (concentrating institution), which has been authorised by the account owner to receive it.
- sent by an account servicing institution (reporting institution) to a financial institution account owner.
- sent by an account servicing institution to a non-financial institution account owner or party authorised by the account owner to receive the information.
- sent by a concentrating institution to a non-financial institution account owner or party authorised by the account owner to receive the information.

It is used to transmit balance information, reflecting the situation at the identified time in field 13D.

For use of messages in the corporate to bank environment, see the MT message implementation guide for corporate customers available on www.swift.com.

MT 941 Network Validated Rules

- C1** The first two characters of the three character currency code in fields 60F, 90D, 90C, 62F, 64 and 65 must be the same for all occurrences of these fields (Error code(s): C27).

MT 941 Usage Rules

- This message should only be used if the account owner(s) has (have) authorised the financial institutions to transmit such information. It must be used according to agreed criteria.
- Financial institutions which receive this message must not use the information for their own purposes.

MT 941 Field Specifications

1. Field 20: Transaction Reference Number

FORMAT

16x

PRESENCE

Mandatory

DEFINITION

This field specifies the reference assigned by the Sender to unambiguously identify the message.

NETWORK VALIDATED RULES

This field must not start or end with a slash '/' and must not contain two consecutive slashes '/' (Error code(s): T26).

2. Field 21: Related Reference

FORMAT

16x

PRESENCE

Optional

DEFINITION

If the MT 941 is sent in response to an MT 920 Request Message, this field must contain the field 20 Transaction Reference Number of the request message.

NETWORK VALIDATED RULES

This field must not start or end with a slash '/' and must not contain two consecutive slashes '/' (Error code(s): T26).

3. Field 25: Account Identification

FORMAT

35x (Account)

PRESENCE

Mandatory

DEFINITION

This field identifies the account for which the balance information is sent.

4. Field 28: Statement Number/Sequence Number

FORMAT

5n[2n] (Statement Number)(Sequence Number)

PRESENCE

Mandatory

DEFINITION

This field contains the sequential number of the report.

USAGE RULES

The sequence number is not required.

5. Field 13D: Date/Time Indication

FORMAT

Option D 6!n4!n1!x4!n (Date)(Time)(Sign)(Offset)

PRESENCE

Optional

DEFINITION

This field indicates the date, time and time zone at which the report was created.

NETWORK VALIDATED RULES

Date must be a valid date expressed as YYMMDD (Error code(s): T50).

Time must be a valid time expressed as HHMM (Error code(s): T38).

Sign is either "+" or "-" (Error code(s): T15).

Time offset is expressed as 'HHMM', where the hour component, that is, 'HH', must be in the range of 00 through 13, and the minute component, that is, 'MM' must be in the range of 00 through 59. Any 'HH' or 'MM' component outside of these range checks will be disallowed (Error code(s): T16).

USAGE RULES

The time zone in which Time is expressed is to be identified by means of the offset against the UTC (Coordinated Universal Time - ISO 8601).

EXAMPLE

If a financial institution in New Zealand creates an MT 941 at 15.15 PM local time on 8 January 2009, Date/Time Indication field would be completed as follows:

```
:13D:0901081515+1300
```

whereby 090108 is the date, 1515 is the local time in New Zealand and +1300 is the offset of local New Zealand time in January against UTC.

Offsets of local time zones against UTC are published on www.swift.com in the *BIC Directory, General Country Information*.

6. Field 60F: Opening Balance

FORMAT

Option F 1!a6!n3!a15d (D/C Mark)(Date)(Currency)(Amount)

PRESENCE

Optional

DEFINITION

This field specifies, for the opening balance, whether it is a debit or credit balance, the date, the currency and the amount of the balance.

CODES

D/C Mark must contain one of the following codes (Error code(s): T51):

C	Credit	The opening balance is a credit balance.
D	Debit	The opening balance is a debit balance.

NETWORK VALIDATED RULES

Date must be a valid date expressed as YYMMDD (Error code(s): T50).

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03,T40,T43).

USAGE RULES

The D/C Mark, Currency and Amount in this field must always be the same as the D/C Mark, Currency and Amount in field 62a (closing balance) of the previous statement message or in field 62F (book balance) of the previous balance report for this account.

7. Field 90D: Number and Sum of Entries

FORMAT

Option D 5n3!a15d (Number)(Currency)(Amount)

PRESENCE

Optional

DEFINITION

This field indicates the total number and amount of debit entries since the last statement or balance report.

NETWORK VALIDATED RULES

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03,T40,T43).

8. Field 90C: Number and Sum of Entries

FORMAT

Option C 5n3!a15d (Number)(Currency)(Amount)

PRESENCE

Optional

DEFINITION

This field indicates the total number and amount of credit entries since the last statement or balance report.

NETWORK VALIDATED RULES

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03,T40,T43).

9. Field 62F: Book Balance

FORMAT

Option F 1!a6!n3!a15d (D/C Mark)(Date)(Currency)(Amount)

PRESENCE

Mandatory

DEFINITION

This field reflects the book balance for the account. If field 13D is present, then this is the book balance as at the end of the business period indicated in field 13D Date/Time Indication. If field 13D is absent, then this field contains the closing book balance for the account as at the end of the business day.

CODES

D/C Mark must contain one of the following codes (Error code(s): T51):

C	Credit	The book balance is a credit balance.
D	Debit	The book balance is a debit balance.

NETWORK VALIDATED RULES

Date must be a valid date expressed as YYMMDD (Error code(s): T50).

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03,T40,T43).

10. Field 64: Closing Available Balance (Available Funds)

FORMAT

1!a6!n3!a15d (D/C Mark)(Date)(Currency)(Amount)

PRESENCE

Optional

DEFINITION

This field indicates the funds which are available to the account owner (if credit balance) or the balance which is subject to interest charges (if debit balance).

CODES

D/C Mark must contain one of the following codes (Error code(s): T51):

C	Credit	The closing available balance is a credit balance.
D	Debit	The closing available balance is a debit balance.

NETWORK VALIDATED RULES

Date must be a valid date expressed as YYMMDD (Error code(s): T50).

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03,T40,T43).

11. Field 65: Forward Available Balance

FORMAT

1!a6!n3!a15d (D/C Mark)(Date)(Currency)(Amount)

PRESENCE

Optional

DEFINITION

This field indicates the funds which are available to the account owner (if a credit or debit balance) for the specified forward value date.

CODES

D/C Mark must contain one of the following codes (Error code(s): T51):

C	Credit	The forward available balance is a credit balance.
D	Debit	The forward available balance is a debit balance.

NETWORK VALIDATED RULES

Date must be a valid date expressed as YYYYMMDD (Error code(s): T50).

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03,T40,T43).

USAGE RULES

When there is more than one value date for the items booked to the account (in this or previous statement periods), this field will indicate the balance which will be available to the account owner on the date(s) indicated.

12. Field 86: Information to Account Owner

FORMAT

6*65x (Narrative)

PRESENCE

Optional

DEFINITION

This field contains additional information for the account owner.

MT 941 Examples

Example 1: Report

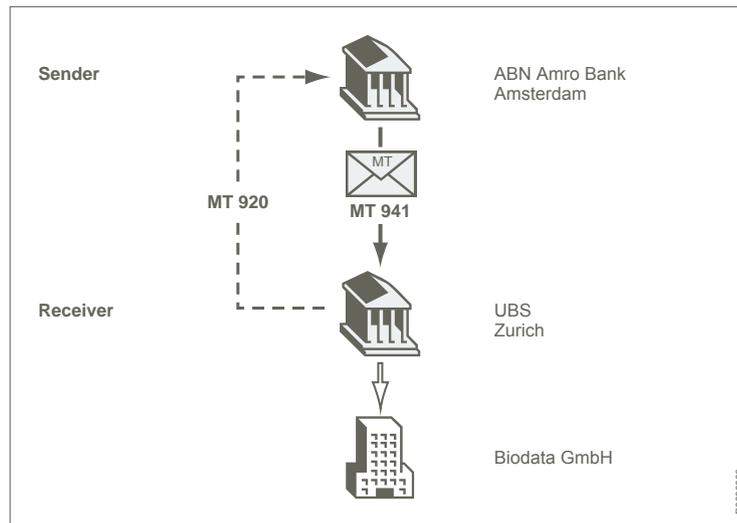

Narrative

ABN Amro Bank, Amsterdam, in response to an MT 920 Request Message, sends an MT 941 to UBS, Zürich, for account number 6894-77381 of Biodata GmbH, for 04 June 2009 at 15:15 local time. The statement number is 212.

Opening Balance:	euro	595,771.95 (Credit)
Total Debits: 72	euro	385,920
Total Credits: 44	euro	450,000

Book Balance:	euro	659,851.95 (Credit)
Closing Available Balance:	euro	480,525.87 (Credit)
Forward Available Balance:		
As of 05 June 2009:	euro	530,691.95 (Credit)

Example 2: Concentrating Institution

Narrative

A corporate customer owns an account with its local bank and also owns accounts with 4 different banks outside its own country. The corporate customer asks its local bank to receive report messages from the 4 international banks on its behalf. The local bank acts as a concentrating institution, receiving the report messages and passing them on to the corporate customer.

Information Flow

MT 942 Interim Transaction Report

Note: As this message may require the implementation of special procedures, its use is governed by bilateral agreements between correspondents.

MT 942 Scope

This message type is:

- sent by an account servicing institution (reporting institution) to a financial institution (concentrating institution) which has been authorised by the account owner to receive it.
- sent by an account servicing institution (reporting institution) to a financial institution account owner.
- sent by an account servicing institution to a non-financial institution account owner or party authorised by the account owner to receive the information.
- sent by a concentrating institution to a non-financial institution account owner or party authorised by the account owner to receive the information.

It is used to transmit detailed and/or summary information about entries debited or credited to the account since:

- the last statement or balance report, or
- the last interim transaction report (sent in the period since the last statement or balance report).

For use of messages in the corporate to bank environment, see the MT message implementation guide for corporate customers available on www.swift.com.

M = Mandatory, O = Optional				

MT 942 Network Validated Rules

- C1** The first two characters of the three character currency code in fields 34F, 90D, and 90C must be the same (Error code(s): C27).
- C2** When only one field 34F is present, the second subfield must not be used. When both fields 34F are present, subfield 2 of the first 34F must contain the value 'D', and subfield 2 of the second 34F must contain the value 'C' (Error code(s): C23).

MT 942 Usage Rules

- This message should only be used if the account owner(s) has (have) authorised the financial institutions to transmit such information. It must be used according to agreed criteria.
- Financial institutions which receive this message must not use the information for their own purposes.
- It is important that amounts be identical to those of the original transaction. For identification purposes, deductions, for example, charges above and beyond those previously accounted for, shall appear separately with the appropriate code. They shall use the same TRN as the original transaction, or other suitable reference if no TRN is available.
- Since the length of a SWIFT message is restricted to the maximum input message length, several messages may be required to accommodate all the information for one statement.
- Depending on financial practice and the agreement(s) between the account servicing institution and the account owner, the items reported in this message may or may not be considered as booked or available funds.

MT 942 Field Specifications

1. Field 20: Transaction Reference Number

FORMAT

16x

PRESENCE

Mandatory

DEFINITION

This field specifies the reference assigned by the Sender to unambiguously identify the message.

NETWORK VALIDATED RULES

This field must not start or end with a slash '/' and must not contain two consecutive slashes '/' (Error code(s): T26).

USAGE RULES

The TRN may be the same or different for the separate messages of an interim report consisting of several messages.

2. Field 21: Related Reference

FORMAT

16x

PRESENCE

Optional

DEFINITION

If the MT 942 is sent in response to an MT 920 Request Message, this field must contain the field 20 Transaction Reference Number of the request message.

NETWORK VALIDATED RULES

This field must not start or end with a slash '/' and must not contain two consecutive slashes '/' (Error code(s): T26).

3. Field 25: Account Identification

FORMAT

35x (Account)

PRESENCE

Mandatory

DEFINITION

This field identifies the account for which the interim transaction report is sent.

4. Field 28C: Statement Number/Sequence Number

FORMAT

Option C 5n[/5n] (Statement Number)(Sequence Number)

PRESENCE

Mandatory

DEFINITION

This field contains the sequential number of the statement, optionally followed by the sequence number of the message within that statement when more than one message is sent for the statement.

USAGE RULES

The statement number should be reset to 1 on 1 January of each year.

If used, the sequence number always starts with 1. When several messages are sent to convey information about a single statement, the first message must contain '1' in Sequence Number.

The sequence number must be incremented by one for each additional message.

Both the statement number and sequence number enable the Receiver to put the different messages into sequence and thus form the complete statement.

EXAMPLE

The first message of a statement is :28C:235/1

The second message is :28C:235/2

and so on.

5. Field 34F: Debit/(Debit and Credit) Floor Limit Indicator**FORMAT**

Option F 3!a[1!a]15d (Currency)(D/C Mark)(Amount)

PRESENCE

Mandatory

DEFINITION

This field specifies the minimum value (transaction amount) reported in the message.

CODES

When D/C Mark is present, it must contain the following code (Error code(s): T51):

D	Debit	Debit floor limit.
---	-------	--------------------

NETWORK VALIDATED RULES

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03,T40,T43).

USAGE RULES

When field 34F Credit Floor Limit Indicator is absent, the floor limit applies to both debit and credit amounts. When different limits apply, field 34F Credit Floor Limit Indicator must be present.

6. Field 34F: Credit Floor Limit Indicator

FORMAT

Option F 3!a[1!a]15d (Currency)(D/C Mark)(Amount)

PRESENCE

Conditional (see rule C2)

DEFINITION

This field specifies the minimum credit value (transaction amount) reported in the message.

CODES

D/C Mark must contain the following code (Error code(s): T51):

C	Credit	Credit floor limit.
---	--------	---------------------

NETWORK VALIDATED RULES

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03,T40,T43).

USAGE RULES

When different limits apply, this field 34F must be present, with a credit indicator ('C').

7. Field 13D: Date/Time Indication

FORMAT

Option D 6!n4!n1!x4!n (Date)(Time)(Sign)(Offset)

PRESENCE

Mandatory

DEFINITION

This field indicates the date, time and time zone at which the report was created.

NETWORK VALIDATED RULES

Date must be a valid date expressed as YYYYMMDD (Error code(s): T50).

Time must be a valid time expressed as HHMM (Error code(s): T38).

Sign is either "+" or "-" (Error code(s): T15).

Time offset is expressed as 'HHMM', where the hour component, that is, 'HH', must be in the range of 00 through 13, and the minute component, that is, 'MM' must be in the range of 00 through 59. Any 'HH' or 'MM' component outside of these range checks will be disallowed (Error code(s): T16).

USAGE RULES

The time zone in which Time is expressed is to be identified by means of the offset against the UTC (Coordinated Universal Time - ISO 8601).

EXAMPLE

If a financial institution in New Zealand creates an MT 942 at 15.15 PM local time on 08 January 2009, Date/Time Indication field would be completed as follows:

```
:13D:0901081515+1300
```

whereby 090108 is the date, 1515 is the local time in New Zealand and +1300 is the offset of local New Zealand time in January against UTC.

Offsets of local time zones against UTC are published on www.swift.com in the *BIC Directory, General Country Information*.

8. Field 61: Statement Line

FORMAT

```
6!n[4!n]2a[1!a]15d1!a3!c16x[//16x]
[34x]
```

where subfields are:

Subfield	Format	Name
1	6!n	(Value Date)
2	[4!n]	(Entry Date)
3	2a	(Debit/Credit Mark)
4	[1!a]	(Funds Code)
5	15d	(Amount)
6	1!a3!c	(Transaction Type)(Identification Code)
7	16x	(Reference for the Account Owner)
8	[//16x]	(Reference of the Account Servicing Institution)
9	[34x]	(Supplementary Details)

PRESENCE

Optional

DEFINITION

This field contains the details of each transaction.

CODES

Subfield 3 Debit/Credit Mark must contain one of the following codes (Error code(s): T51):

C	Credit
D	Debit
EC	Expected Credit
ED	Expected Debit
RC	Reversal of Credit (debit entry)
RD	Reversal of Debit (credit entry)

CODES

In subfield 6, Transaction Type must contain one of the following codes (Error code(s): T53):

S	SWIFT transfer	For entries related to SWIFT transfer instructions and subsequent charge messages.
N	Non-SWIFT transfer	For entries related to payment and transfer instructions, including related charges messages, not sent through SWIFT or where an alpha description is preferred.
F	First advice	For entries being first advised by the statement (items originated by the account servicing institution).

CODES

In subfield 6, when Transaction Type is 'S', Identification Code will indicate the message type of the SWIFT message causing the entry (for debit entries) or the message type of the SWIFT message used to advise the account owner (for credit entries). It must be a number (format 3!n) in the range 100-999 (Error code(s): T18).

CODES

In subfield 6, when Transaction Type is 'N' or 'F', Identification Code may contain one of the following codes:

BNK	Securities Related Item - Bank Fees
BOE	Bill of Exchange
BRF	Brokerage Fee
CAR	Securities Related Item - Corporate Actions Related (should only be used when no specific corporate action event code is available)
CAS	Securities Related Item - Cash in Lieu
CHG	Charges and Other Expenses

CHK	Cheques	
CLR	Cash Letters/ Cheques Remittance	
CMI	Cash Management Item - No Detail	
CMN	Cash Management Item - Notional Pooling	
CMP	Compensation Claims	
CMS	Cash Management Item - Sweeping	
CMT	Cash Management Item - Topping	
CMZ	Cash Management Item - Zero Balancing	
COL	Collections (used when entering a principal amount)	
COM	Commission	
CPN	Coupons	Securities Related Item - Coupon Payments.
DCR	Documentary Credit (used when entering a principal amount)	
DDT	Direct Debit Item	
DIS	Securities Related Item - Gains Disbursement	
DIV	Dividends	Securities Related Item - Dividends.
EQA	Equivalent Amount	
EXT	Securities Related Item - External Transfer for Own Account	
FEX	Foreign Exchange	
INT	Interest	Interest related amount.
LBX	Lock Box	
LDP	Loan Deposit	
MAR	Securities Related Item - Margin Payments/Receipts	

MAT	Securities Related Item - Maturity	
MGT	Management fees	Securities Related Item - Management Fees.
MSC	Miscellaneous	
NWI	Securities Related Item - New Issues Distribution	
ODC	Overdraft Charge	
OPT	Securities Related Item - Options	
PCH	Purchase	Securities Related Item - Purchase (including STIF and Time deposits).
POP	Securities Related Item - Pair-off Proceeds	
PRN	Securities Related Item - Principal Pay-down/Pay-up	
REC	Reclaim	Securities Related Item - Tax Reclaim.
RED	Securities Related Item - Redemption/Withdrawal	
RIG	Securities Related Item - Rights	
RTI	Returned Item	
SAL	Sale	Securities Related Item - Sale (including STIF and Time deposits).
SEC	Securities	Securities (used when entering a principal amount).
SLE	Securities Related Item - Securities Lending Related	
STO	Standing Order	
STP	Securities Related Item - Stamp Duty	
SUB	Securities Related Item - Subscription	
SWP	Securities Related Item - SWAP Payment	
TAX	Securities Related Item - Withholding Tax Payment	
TCK	Travellers Cheques	

TCM	Securities Related Item - Tripartite Collateral Management
TRA	Securities Related Item - Internal Transfer for Own Account
TRF	Transfer
TRN	Securities Related Item - Transaction Fee
UWC	Securities Related Item - Underwriting Commission
VDA	Value Date Adjustment (used with an entry made to withdraw an incorrectly dated entry - it will be followed by the correct entry with the relevant code)
WAR	Securities Related Item - Warrant

NETWORK VALIDATED RULES

Subfield 1, **Value Date**, must be a valid date expressed as YYMMDD (Error code(s): T50).

The SWIFT System validates subfield 2, **Entry Date** (Date in reduced ISO form), using current System Year (Error code(s): T50).

The integer part of subfield 5, Amount, must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length (Error code(s): T40,T43).

USAGE RULES

This field may be repeated within the constraints of the maximum input message length.

'Original' advice for charges, that is, the first time the account owner is informed of a charge, must be identified in subfield 6, with the **Transaction Type** 'F' and the **Identification Code** 'CHG'.

The following rules apply to subfield 7, **Reference for the Account Owner**:

- At least one valid character other than a blank must be present.
- For debit entries, the purpose of this subfield is to identify, to the account owner, the instruction which caused the debit. Therefore, the content of this subfield is the field 20 Sender's Transaction Reference Number (or its equivalent) of the original instruction.
- Credit entries may be the result of one of the following situations:
 1. The account servicing institution is identifying, to the account owner the receipt of funds for its account as a result of a related transaction. In this case, the content of subfield 7, Reference for the Account

Owner is the reference for the beneficiary (for example, field 21 Related Reference) of the related transaction.

2. The account servicing institution has issued a payment instruction to the account owner and the credit identified in this subfield is for that payment. The content of subfield 7, Reference for the Account Owner is the field 20 Transaction Reference Number (or its equivalent) of the payment instruction issued by the account servicing institution.
- If no reference is available for this subfield, the code NONREF shall be used. The account servicing institution must then supply, in subfield 9, **Supplementary Details**, what it considers to be the best alternative information.
 - This reference must be quoted in all cases when available. In cases where a transaction passes through several financial institutions, the original reference must always be forwarded.
 - This reference must always be quoted against any charges or fees debited by the account servicing institution.
 - Debits against standing instructions must show the reference of the standing instruction.
 - In cases where a mutually agreed alternative reference exists (for example, in foreign exchange or money market transactions), this reference should then be used.
 - If the statement entry concerns a cheque, the cheque number should be indicated in this subfield.

The following rules apply to subfield 8, **Reference of the Account Servicing Institution**:

- The content of this subfield is the account servicing institution's own reference for the transaction.
- When the transaction has been initiated by the account servicing institution, this reference may be identical to subfield 7, Reference for the Account Owner. If this is the case, Reference of the Account Servicing Institution, subfield 8 may be omitted.

The following rules apply to subfield 9, **Supplementary Details**:

- When no reference for the account owner is available, that is, subfield 7, Reference for the Account Owner, contains NONREF, the account servicing institution should provide the best available alternative information in this subfield.
- Supplementary details may be provided when an advice has not been sent for a transaction, or to provide additional information to facilitate reconciliation.
- This field may include ERI, as specified in the chapter entitled "Euro - Impact on SWIFT Message Standards".
- This field may contain ERI to transport dual currencies, as explained in the chapter "Euro - Impact on Category 9 Message Standards".
- In order to comply with the EC-directive on cross border credit transfers, the optional code word EXCH may be used to transport an exchange rate. In line with ERI, the code word EXCH is placed between slashes, followed by the exchange rate, format 12d, and terminated with another slash.

EXAMPLE

(1) :61:0901230122C3500,25FCHK304955//4958843

(2) :61:0901230122C3500,25FCHK304955//4958843
ADDITIONAL INFORMATION

9. Field 86: Information to Account Owner

FORMAT

6*65x (Narrative)

PRESENCE

Optional

DEFINITION

This field contains additional information about the transaction detailed in the preceding statement line which is to be passed on to the account owner.

USAGE RULES

This field may contain ERI to transport dual currencies, as explained in the chapter 'Euro - Impact on Category 9 Message Standards'.

Since the charges field in the customer transfers is repetitive, it may be necessary to report more than one charges amount in the resulting statement. In this case, it is allowed to repeat the code word CHGS before the code word OCMT. The order in which the charges are specified is the same as in the customer transfers, that is, the order in which the charges have been taken during the transaction. So, the last appearance of the code word CHGS always specifies the charges (if any) of the account servicing institution.

In order to comply with the EC-directive on cross border credit transfers, the optional code word EXCH may be used to transport an exchange rate. In line with ERI, the code word EXCH is placed between slashes, followed by the exchange rate, format 12d, and terminated with another slash. The code may be repeated if the account servicing institution wants to report an exchange rate that it applied, in addition to the exchange rate received in the instruction. The order in which the exchange rates are specified is the same as the order in which the rates have been applied during the transaction. So, the last appearance of the code word EXCH always specifies the rate applied by the account servicing institution.

An ordering party is identified with the preceding code /ORDP/. The information following this code is copied from field 50a of the customer payment order, or field 52a (sender if field 52a is not present) of the financial institution transfer. The code should be used at the beginning of a line.

In case of a debit item, a beneficiary party may be identified with the preceding code /BENM/. The information following this code is copied from field 59a of the customer payment order, or field 58a of the financial institution transfer. The code should be used at the beginning of a line.

In case remittance information from field 70 of the payment instruction is to be included in this field, it should be preceded by the code /REMI/.

In case the information in field 72 of the payment instruction is intended for the account owner, it should be copied into field 86 as it is. Codes used in field 72 of the payment instruction have therefore the same meaning in field 86 of the statement. If only free text is used in field 72, it is to be copied as it is since a code in field 86 will not add any value.

10. Field 90D: Number and Sum of Entries

FORMAT

Option D 5n3!a15d (Number)(Currency)(Amount)

PRESENCE

Optional

DEFINITION

This field indicates the total number and amount of debit entries.

NETWORK VALIDATED RULES

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03,T40,T43).

11. Field 90C: Number and Sum of Entries

FORMAT

Option C 5n3!a15d (Number)(Currency)(Amount)

PRESENCE

Optional

DEFINITION

This field indicates the total number and amount of credit entries.

NETWORK VALIDATED RULES

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03,T40,T43).

12. Field 86: Information to Account Owner

FORMAT

6*65x (Narrative)

PRESENCE

Optional

DEFINITION

This field contains additional information about the message as a whole which is to be passed to the account owner.

MT 942 Examples

Example 1: Report

Narrative

Merita Bank, Helsinki, in response to an MT 920 Request Message (reference 5678), sends an MT 942 to Midland Bank, London, for account number 123-45678 of Smythe Publications, for 26 June 2009, as of 12:00 Noon.

Debit Floor Limit: euro 100,000

Credit Floor Limit: euro 50,000

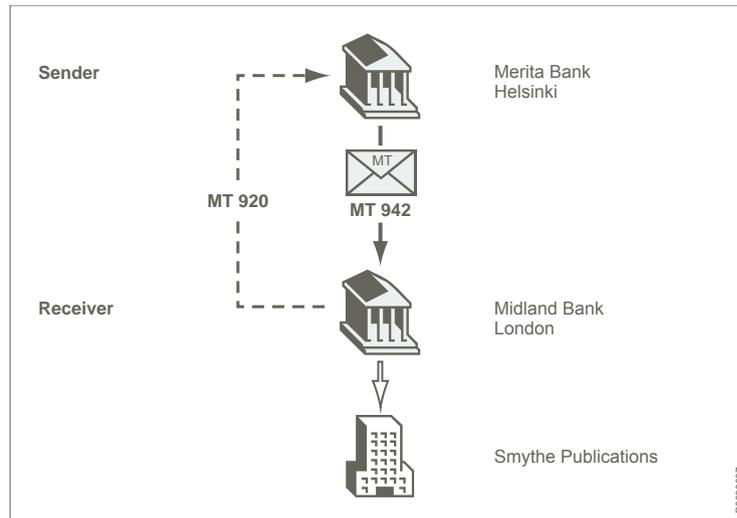

Transaction Details:

- (1) Value Date: 26 June 2009 Debit: EUR 120,000
 Transaction Type: Collections
 Reference for the Account Owner: ABCD
 Merita Bank's Reference: 12345
- (2) Value Date: 26 June 2009 Credit: EUR 55,000
 Transaction Type: Foreign Exchange
 Reference for the Account Owner: 99485
 Merita Bank's Reference: 678922

Total Debits: 9 euro 210,000

Total Credits: 87 euro 385,700

Example 2: Concentrating Institution

Narrative

A corporate customer owns an account with its local bank and also owns accounts with 4 different banks outside its own country. The corporate customer asks its local bank to receive report messages from the 4 international banks on its behalf. The local bank acts as a concentrating institution, receiving the report messages and passing them on to the corporate customer.

Information Flow

MT 950 Statement Message

MT 950 Scope

This message type is sent by an account servicing institution to an account owner.

It is used to transmit detailed information about all entries, whether or not caused by a SWIFT message, booked to the account.

MT 950 Format Specifications

MT 950 Statement Message

Status	Tag	Field Name	Content/Options	No.
M	20	Transaction Reference Number	16x	1
M	25	Account Identification	35x	2
M	28C	Statement Number/Sequence Number	5n[/5n]	3
M	60a	Opening Balance	F or M	4
----->				
O	61	Statement Line	6!n[4!n]2a[1!a]15d1!a3!c16x[//16x] [34x]	5

M	62a	Closing Balance (Booked Funds)	F or M	6
O	64	Closing Available Balance (Available Funds)	1!a6!n3!a15d	7
M = Mandatory, O = Optional				

MT 950 Network Validated Rules

- C1** The first two characters of the three character currency code in fields 60a, 62a and 64 must be the same (Error code(s): C27).

MT 950 Usage Rules

- Charges, interest and other adjustments may be referenced as follows:
 - By reference to a previous MT n90 Advice of Charges, Interest and Other Adjustments message (for information regarding the formatting of the MTn90, see *Category n - Common Group Messages*).
 - By original advice via this statement, under the following conditions:
 - The charges must be unambiguously identified with a single associated underlying transaction, for example, the account owner's reference of the original transaction.
 - The principal amount must be separately identified on the statement.
 - The required references must fit the constraints of the statement line.

- It is important that amounts should be identical to those of related messages. Charges which are clearly indicated in another message concerning the same entry, or which form an integral part of another message, for example, proceeds of a collection, do not need to be specifically indicated in the statement. Deductions, for example, charges, above and beyond those previously accounted for in a related message shall appear separately with the appropriate code. They shall use the same reference for the account owner or other suitable reference if no reference for the account owner is available.
- The account servicing institution must not 'bulk' separate transactions, charges, or charges with transactions. When booking multiple messages, individual transactions, for example, one entry per TRN (field 20), must be booked.
- It is recommended that statements be sent daily, that is, at the end of each business day, when movement in the account has occurred. If no movement has occurred, that is, no entries have been posted, it is recommended that the statement frequency should be monthly, and that the maximum interval between statements should not exceed one year.
- To facilitate manual reconciliation, it is recommended that statement entries be sorted by debits and credits and these by value date in ascending amounts.
- Since the length of a SWIFT message is restricted to the maximum input message length, several messages may be required to accommodate all the information for one statement.

MT 950 Field Specifications

1. Field 20: Transaction Reference Number

FORMAT

16x

PRESENCE

Mandatory

DEFINITION

This field specifies the reference assigned by the Sender to unambiguously identify the message.

NETWORK VALIDATED RULES

This field must not start or end with a slash '/' and must not contain two consecutive slashes '/' (Error code(s): T26).

USAGE RULES

The TRN may be the same or different for the separate messages of a statement consisting of several messages.

2. Field 25: Account Identification

FORMAT

35x (Account)

PRESENCE

Mandatory

DEFINITION

This field identifies the account for which the statement is sent.

3. Field 28C: Statement Number/Sequence Number

FORMAT

Option C 5n[/5n] (Statement Number)(Sequence Number)

PRESENCE

Mandatory

DEFINITION

This field contains the sequential number of the statement, optionally followed by the sequence number of the message within that statement when more than one message is sent for the statement.

EXAMPLE

The first message of a statement is :28C:235/1

The second message is :28C:235/2 and so on.

4. Field 60a: Opening Balance

FORMAT

Option F	1!a6!n3!a15d	(D/C Mark)(Date)(Currency)(Amount)
Option M	1!a6!n3!a15d	(D/C Mark)(Date)(Currency)(Amount)

PRESENCE

Mandatory

DEFINITION

This field specifies, for the (intermediate) opening balance, whether it is a debit or credit balance, the date, the currency and the amount of the balance.

CODES

In option F, or M, D/C Mark must contain one of the following codes (Error code(s): T51):

C	Credit	The (intermediate) opening balance is a credit balance.
D	Debit	The (intermediate) opening balance is a debit balance.

NETWORK VALIDATED RULES

Date must be a valid date expressed as YYMMDD (Error code(s): T50).

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03,T40,T43).

USAGE RULES

The D/C Mark, Currency and Amount in this field must always be the same as the D/C Mark, Currency and Amount in field 62a (closing balance) of the previous statement message for this account.

The first statement message for a specified period must contain field 60F (first opening balance); additional statement messages for the same statement period must contain field 60M (intermediate opening balance).

5. Field 61: Statement Line

FORMAT

6!n[4!n]2a[1!a]15d1!a3!c16x[//16x]
[34x]

where subfields are:

Subfield	Format	Name
1	6!n	(Value Date)
2	[4!n]	(Entry Date)
3	2a	(Debit/Credit Mark)
4	[1!a]	(Funds Code)
5	15d	(Amount)
6	1!a3!c	(Transaction Type)(Identification Code)
7	16x	(Reference for the Account Owner)
8	[//16x]	(Reference of the Account Servicing Institution)
9	[34x]	(Supplementary Details)

PRESENCE

Optional

DEFINITION

This field contains the details of each transaction.

Subfield 1 Value Date is a date expressed in full ISO 8601 format YYMMDD.

Subfield 2 Entry Date is a date expressed in reduced ISO 8601 format MMDD.

Subfield 4 Funds Code is the 3rd character of the currency code, if needed.

CODES

Subfield 3 Debit/Credit Mark must contain one of the following codes (Error code(s): T51):

C	Credit
D	Debit
RC	Reversal of Credit (debit entry)
RD	Reversal of Debit (credit entry)

CODES

In subfield 6, Transaction Type must contain one of the following codes (Error code(s): T53):

S	SWIFT transfer	For entries related to SWIFT transfer instructions and subsequent charge messages.
N	Non-SWIFT transfer	For entries related to payment and transfer instructions, including related charges messages, not sent through SWIFT or where an alpha description is preferred.
F	First advice	For entries being first advised by the statement (items originated by the account servicing institution).

CODES

In subfield 6, when Transaction Type is 'S', Identification Code will indicate the message type of the SWIFT message causing the entry (for debit entries) or the message type of the SWIFT message used to advise the account owner (for credit entries). It must be a number (format 3!n) in the range 100-999 (Error code(s): T18).

CODES

In subfield 6, when Transaction Type is 'N' or 'F', Identification Code may contain one of the following codes:

BNK	Securities Related Item - Bank Fees
BOE	Bill of Exchange
BRF	Brokerage Fee
CAR	Securities Related Item - Corporate Actions Related (should only be used when no specific corporate action event code is available)
CAS	Securities Related Item - Cash in Lieu
CHG	Charges and Other Expenses
CHK	Cheques

CLR	Cash Letters/ Cheques Remittance	
CMI	Cash Management Item - No Detail	
CMN	Cash Management Item - Notional Pooling	
CMP	Compensation Claims	
CMS	Cash Management Item - Sweeping	
CMT	Cash Management Item - Topping	
CMZ	Cash Management Item - Zero Balancing	
COL	Collections (used when entering a principal amount)	
COM	Commission	
CPN	Coupons	Securities Related Item - Coupon Payments.
DCR	Documentary Credit (used when entering a principal amount)	
DDT	Direct Debit Item	
DIS	Securities Related Item - Gains Disbursement	
DIV	Dividends	Securities Related Item - Dividends.
EQA	Equivalent Amount	
EXT	Securities Related Item - External Transfer for Own Account	
FEX	Foreign Exchange	
INT	Interest	Interest related amount.
LBX	Lock Box	
LDP	Loan Deposit	
MAR	Securities Related Item - Margin Payments/Receipts	

MAT	Securities Related Item - Maturity	
MGT	Management fees	Securities Related Item - Management Fees.
MSC	Miscellaneous	
NWI	Securities Related Item - New Issues Distribution	
ODC	Overdraft Charge	
OPT	Securities Related Item - Options	
PCH	Purchase	Securities Related Item - Purchase (including STIF and Time deposits).
POP	Securities Related Item - Pair-off Proceeds	
PRN	Securities Related Item - Principal Pay-down/Pay-up	
REC	Reclaim	Securities Related Item - Tax Reclaim.
RED	Securities Related Item - Redemption/Withdrawal	
RIG	Securities Related Item - Rights	
RTI	Returned Item	
SAL	Sale	Securities Related Item - Sale (including STIF and Time deposits).
SEC	Securities	Securities (used when entering a principal amount).
SLE	Securities Related Item - Securities Lending Related	
STO	Standing Order	
STP	Securities Related Item - Stamp Duty	
SUB	Securities Related Item - Subscription	
SWP	Securities Related Item - SWAP Payment	
TAX	Securities Related Item - Withholding Tax Payment	
TCK	Travellers Cheques	

TCM	Securities Related Item - Tripartite Collateral Management
TRA	Securities Related Item - Internal Transfer for Own Account
TRF	Transfer
TRN	Securities Related Item - Transaction Fee
UWC	Securities Related Item - Underwriting Commission
VDA	Value Date Adjustment (used with an entry made to withdraw an incorrectly dated entry - it will be followed by the correct entry with the relevant code)
WAR	Securities Related Item - Warrant

NETWORK VALIDATED RULES

Subfield 1, **Value Date**, must be a valid date expressed as YYMMDD (Error code(s): T50).

The SWIFT System validates subfield 2, **Entry Date** (Date in reduced ISO form MMDD), using current System Year (Error code(s): T50).

The integer part of subfield 5, Amount, must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length (Error code(s): T40,T43).

USAGE RULES

This field may be repeated within the constraints of the maximum input message length.

'Original' advice for charges, that is, the first time the account owner is informed of a charge, must be identified in subfield 6, with the **Transaction Type** 'F' and the **Identification Code** 'CHG'.

The following rules apply to subfield 7, **Reference for the Account Owner**:

- At least one valid character other than a blank must be present.
- For debit entries, the purpose of this subfield is to identify, to the account owner, the instruction which caused the debit. Therefore, the content of this subfield is the field 20 Sender's Transaction Reference Number (or its equivalent) of the original instruction.
- Credit entries may be the result of one of the following situations:
 1. The account servicing institution is identifying, to the account owner the receipt of funds for its account as a result of a related transaction. In this case, the content of subfield 7, Reference for the Account

Owner is the reference for the beneficiary (for example, field 21 Related Reference) of the related transaction.

2. The account servicing institution has issued a payment instruction to the account owner and the credit identified in this subfield is for that payment. The content of subfield 7, Reference for the Account Owner is the field 20 Transaction Reference Number (or its equivalent) of the payment instruction issued by the account servicing institution.
- If no reference is available for this subfield, the code NONREF shall be used. The account servicing institution must then supply, in subfield 9, **Supplementary Details**, what it considers to be the best alternative information.
 - This reference must be quoted in all cases when available. In cases where a transaction passes through several financial institutions, the original reference must always be forwarded.
 - This reference must always be quoted against any charges or fees debited by the account servicing institution.
 - Debits against standing instructions must show the reference of the standing instruction.
 - In cases where a mutually agreed alternative reference exists (for example, in foreign exchange or money market transactions), this reference should then be used.
 - If the statement entry concerns a cheque, the cheque number should be indicated in this subfield.

The following rules apply to subfield 8, **Reference of the Account Servicing Institution**:

- The content of this subfield is the account servicing institution's own reference for the transaction.
- When the transaction has been initiated by the account servicing institution, this reference may be identical to subfield 7, Reference for the Account Owner. If this is the case, Reference of the Account Servicing Institution, subfield 8 may be omitted.

The following rules apply to subfield 9, **Supplementary Details**:

- When no reference for the account owner is available, that is, subfield 7, Reference for the Account Owner contains NONREF, the account servicing institution should provide the best available alternative information in this subfield.
- Supplementary details may be provided when an advice has not been sent for a transaction, or to provide additional information to facilitate reconciliation.

EXAMPLE

(1) : 61:0901230122C3500,25FCHK304955//4958843

(2) : 61:0901230122C3500,25FCHK304955//4958843

ADDITIONAL INFORMATION

6. Field 62a: Closing Balance (Booked Funds)

FORMAT

Option F	1!a6!n3!a15d	(D/C Mark)(Date)(Currency)(Amount)
Option M	1!a6!n3!a15d	(D/C Mark)(Date)(Currency)(Amount)

PRESENCE

Mandatory

DEFINITION

This field specifies, for the (intermediate) closing balance, whether it is a debit or credit balance, the date, the currency and the amount of the balance.

CODES

In option F, or M, D/C Mark must contain one of the following codes (Error code(s): T51):

C	Credit	The (intermediate) closing balance is a credit balance.
D	Debit	The (intermediate) closing balance is a debit balance.

NETWORK VALIDATED RULES

Date must be a valid date expressed as YYMMDD (Error code(s): T50).

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03,T40,T43).

USAGE RULES

The D/C Mark, Currency and Amount in this field must always be the same as the D/C Mark, Currency and Amount in field 60a (opening balance) of the subsequent statement message for this account.

If there is only one statement message transmitted for the period, this field must use tag option F, that is, 62F (final closing balance). When several messages are transmitted for the same statement period, all messages except the last message must contain field 62M (intermediate closing balance); the last message of the statement must contain field 62F.

7. Field 64: Closing Available Balance (Available Funds)**FORMAT**

1!a6!n3!a15d (D/C Mark)(Date)(Currency)(Amount)

PRESENCE

Optional

DEFINITION

This field indicates the funds which are available to the account owner (if credit balance) or the balance which is subject to interest charges (if debit balance).

CODES

D/C Mark must contain one of the following codes (Error code(s): T51):

C	Credit	The closing available balance is a credit balance.
D	Debit	The closing available balance is a debit balance.

NETWORK VALIDATED RULES

Date must be a valid date expressed as YYMMDD (Error code(s): T50).

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03,T40,T43).

MT 950 Examples

Narrative

On 28 May, 2009, ABN Amro Bank, Amsterdam, sends a statement of account to UBS, Zürich. The statement contains the following information:

Account Number 123-456789

Statement Number 102

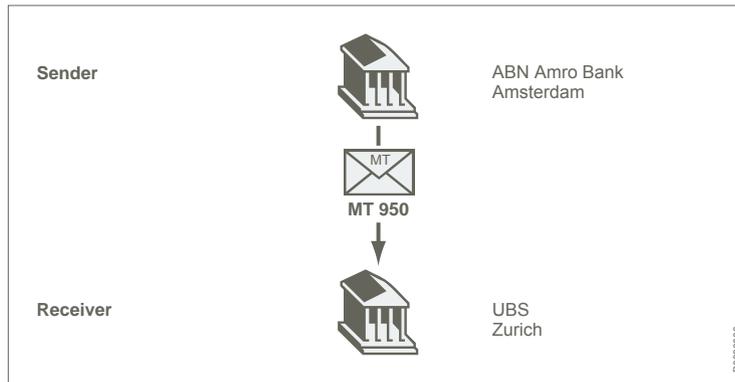

Opening Balance: euro (EUR) 3,723,495 (Credit)

MT 970 Netting Statement

Note: This message may only be sent and received after prior arrangement between a user and SWIFT.

MT 970 Scope

This message type is sent at pre-arranged times from a netting system to a subscriber to the netting system.

It is used to provide detailed information about all the transactions which have been recorded by the netting system involving the receiving financial institution.

All transactions are reported once only in an MT 970 Netting Statement.

MT 970 Format Specifications

MT 970 Netting Statement

Status	Tag	Field Name	Content/Options	No.
M	20	Transaction Reference Number	16x	1
M	25	Account Identification	35x	2
M	28C	Statement Number/Sequence Number	5n[/5n]	3
M	60a	Opening Balance	F or M	4
----->				
O	61	Statement Line	6!n[4!n]2a[1!a]15d1!a3!c16x[//16x] [34x]	5

M	62a	Closing Balance	F or M	6
O	64	Closing Available Balance	1!a6!n3!a15d	7
M = Mandatory, O = Optional				

MT 970 Network Validated Rules

- C1** The first two characters of the three character currency code in fields 60a, 62a and 64 must be the same (Error code(s): C27).

MT 970 Usage Rules

- Entries must be sorted by ascending amount, within debits and credits.
- Since the length of a SWIFT message is restricted to the maximum input message length, several messages may be required to accommodate all the information in one statement.

MT 970 Field Specifications

1. Field 20: Transaction Reference Number

FORMAT

16x

PRESENCE

Mandatory

DEFINITION

This field specifies a reference assigned by the Sender to unambiguously identify the message.

NETWORK VALIDATED RULES

This field must not start or end with a slash '/' and must not contain two consecutive slashes '/' (Error code(s): T26).

USAGE RULES

The TRN may be the same or different for the separate messages of a netting statement consisting of several messages.

2. Field 25: Account Identification

FORMAT

35x

PRESENCE

Mandatory

DEFINITION

This field identifies the netting position for which the netting statement is sent.

3. Field 28C: Statement Number/Sequence Number

FORMAT

Option C 5n[/5n] (Statement Number)(Sequence Number)

PRESENCE

Mandatory

DEFINITION

This field contains the statement number of the netting statement, optionally followed by the sequence number of the message within that statement, when more than one message is sent for the statement.

EXAMPLE

The first message of a statement is :28C:235/1

The second message is :28C:235/2 and so on.

4. Field 60a: Opening Balance

FORMAT

Option F	1!a6!n3!a15d	(D/C Mark)(Date)(Currency)(Amount)
Option M	1!a6!n3!a15d	(D/C Mark)(Date)(Currency)(Amount)

PRESENCE

Mandatory

DEFINITION

This field specifies for the (intermediate) opening balance, whether it is a debit or credit balance, the date, the currency and the amount of the balance.

CODES

In option F, or M, D/C Mark must contain one of the following codes (Error code(s): T51):

C	Credit	The (intermediate) opening balance is a credit balance.
D	Debit	The (intermediate) opening balance is a debit balance.

NETWORK VALIDATED RULES

Date must be a valid date expressed as YYMMDD (Error code(s): T50).

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03,T40,T43).

USAGE RULES

This field must always be the same as field 62a (closing balance) of the previous netting statement message (if any) for this netting position.

The first netting statement message of a statement must contain field 60F (first opening balance). Subsequent messages of the same statement must contain field 60M (intermediate opening balance).

5. Field 61: Statement Line

FORMAT

[34x]

where subfields are:

Subfield	Format	Name
1	6!n	(Value Date)
2	[4!n]	(Entry Date)
3	2a	(Debit/Credit Mark)
4	[1!a]	(Funds Code)
5	15d	(Amount)
6	1!a3!c	(Transaction Type)(Identification Code)
7	16x	(Reference for the Account Owner)
8	[//16x]	(Reference of the Account Servicing Institution)
9	[34x]	(Supplementary Details)

PRESENCE

Optional

DEFINITION

This field contains the details of each transaction.

CODES

Subfield 3 Debit/Credit Mark must contain one of the following codes (Error code(s): T51):

C	Credit
D	Debit
RC	Reversal of Credit (debit entry)
RD	Reversal of Debit (credit entry)

CODES

In subfield 6, Transaction Type must contain one of the following codes (Error code(s): T53):

S	SWIFT transfer	For entries related to SWIFT transfer instructions and subsequent charge messages.
N	Non-SWIFT transfer	For entries related to payment and transfer instructions, including related charges messages, not sent through SWIFT or where an alpha description is preferred.

F	First advice	For entries being first advised by the statement (items originated by the account servicing institution).
---	--------------	---

CODES

In subfield 6, when Transaction Type is 'S', Identification Code will indicate the message type of the SWIFT message causing the entry (for debit entries) or the message type of the SWIFT message used to advise the account owner (for credit entries). It must be a number (format 3!n) in the range 100-999 (Error code(s): T18).

CODES

In subfield 6, when Transaction Type is 'N' or 'F', Identification Code may contain one of the following codes:

BNK	Securities Related Item - Bank Fees
BOE	Bill of Exchange
BRF	Brokerage Fee
CAR	Securities Related Item - Corporate Actions Related (should only be used when no specific corporate action event code is available)
CAS	Securities Related Item - Cash in Lieu
CHG	Charges and Other Expenses
CHK	Cheques
CLR	Cash Letters/ Cheques Remittance
CMI	Cash Management Item - No Detail
CMN	Cash Management Item - Notional Pooling
CMP	Compensation Claims
CMS	Cash Management Item - Sweeping
CMT	Cash Management Item - Topping
CMZ	Cash Management Item - Zero Balancing

COL	Collections (used when entering a principal amount)	
COM	Commission	
CPN	Coupons	Securities Related Item - Coupon Payments.
DCR	Documentary Credit (used when entering a principal amount)	
DDT	Direct Debit Item	
DIS	Securities Related Item - Gains Disbursement	
DIV	Dividends	Securities Related Item - Dividends.
EQA	Equivalent Amount	
EXT	Securities Related Item - External Transfer for Own Account	
FEX	Foreign Exchange	
INT	Interest	Interest related amount.
LBX	Lock Box	
LDP	Loan Deposit	
MAR	Securities Related Item - Margin Payments/Receipts	
MAT	Securities Related Item - Maturity	
MGT	Management fees	Securities Related Item - Management Fees.
MSC	Miscellaneous	
NWI	Securities Related Item - New Issues Distribution	
ODC	Overdraft Charge	
OPT	Securities Related Item - Options	
PCH	Purchase	Securities Related Item - Purchase (including STIF and Time deposits).
POP	Securities Related Item - Pair-off Proceeds	
PRN	Securities Related Item - Principal Pay-down/Pay-up	

REC	Reclaim	Securities Related Item - Tax Reclaim.
RED	Securities Related Item - Redemption/Withdrawal	
RIG	Securities Related Item - Rights	
RTI	Returned Item	
SAL	Sale	Securities Related Item - Sale (including STIF and Time deposits).
SEC	Securities	Securities (used when entering a principal amount).
SLE	Securities Related Item - Securities Lending Related	
STO	Standing Order	
STP	Securities Related Item - Stamp Duty	
SUB	Securities Related Item - Subscription	
SWP	Securities Related Item - SWAP Payment	
TAX	Securities Related Item - Withholding Tax Payment

TRA	Securities Related Item - Internal Transfer for Own Account	
TRF	Transfer	
TRN	Securities Related Item - Transaction Fee	
UWC	Securities Related Item - Underwriting Commission	

VDA	Value Date Adjustment (used with an entry made to withdraw an incorrectly dated entry - it will be followed by the correct entry with the relevant code)
WAR	Securities Related Item - Warrant

NETWORK VALIDATED RULES

Subfield 1, **Value Date**, must be a valid date expressed as YYMMDD (Error code(s): T50).

The SWIFT System validates subfield 2, **Entry Date** (Date in reduced ISO form), using current System Year (Error code(s): T50).

The integer part of subfield 5, Amount, must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length (Error code(s): T40,T43).

USAGE RULES

This field may be repeated within the constraints of the maximum input message length.

'Original' advice for charges, that is, the first time the account owner is informed of a charge, must be identified in subfield 6, with the **Transaction Type** 'F' and the **Identification Code** 'CHG'.

The following rules apply to subfield 7, **Reference for the Account Owner**:

- At least one valid character other than a blank must be present.
- For debit entries, the purpose of this subfield is to identify, to the account owner, the instruction which caused the debit. Therefore, the content of this subfield is the field 20 Sender's Transaction Reference Number (or its equivalent) of the original instruction.
- Credit entries may be the result of one of the following situations:
 1. The account servicing institution is identifying, to the account owner the receipt of funds for its account as a result of a related transaction. In this case, the content of subfield 7, Reference for the Account Owner is the reference for the beneficiary (for example, field 21 Related Reference) of the related transaction.
 2. The account servicing institution has issued a payment instruction to the account owner and the credit identified in this subfield is for that payment. The content of subfield 7, Reference for the Account Owner is the field 20 Transaction Reference Number (or its equivalent) of the payment instruction issued by the account servicing institution.
- If no reference is available for this subfield, the code NONREF shall be used. The account servicing institution must then supply, in subfield 9, **Supplementary Details**, what it considers to be the best alternative information.
- This reference must be quoted in all cases when available. In cases where a transaction passes through several financial institutions, the original reference must always be forwarded.
- This reference must always be quoted against any charges or fees debited by the account servicing institution.
- Debits against standing instructions must show the reference of the standing instruction.

- In cases where a mutually agreed alternative reference exists (for example, in foreign exchange or money market transactions), this reference should then be used.
- If the statement entry concerns a cheque, the cheque number should be indicated in this subfield.

The following rules apply to subfield 8, **Reference of the Account Servicing Institution**:

- The content of this subfield is the account servicing institution's own reference for the transaction.
- When the transaction has been initiated by the account servicing institution, this reference may be identical to subfield 7, Reference for the Account Owner. If this is the case, Reference of the Account Servicing Institution, subfield 8 may be omitted.

The following rules apply to subfield 9, **Supplementary Details**:

- When no reference for the account owner is available, that is, subfield 7, Reference for the Account Owner contains NONREF, the account servicing institution should provide the best available alternative information in this subfield.
- Supplementary details may be provided when an advice has not been sent for a transaction, or to provide additional information to facilitate reconciliation.

EXAMPLE

(1) : 61 : 0901230122C3500,25FCHK304955//4958843

(2) : 61 : 0901230122C3500,25FCHK304955//4958843

ADDITIONAL INFORMATION

6. Field 62a: Closing Balance

FORMAT

Option F	1!a6!n3!a15d	(D/C Mark)(Date)(Currency)(Amount)
Option M	1!a6!n3!a15d	(D/C Mark)(Date)(Currency)(Amount)

PRESENCE

Mandatory

DEFINITION

This field specifies, for the (intermediate) closing balance, whether it is a debit or credit balance, the date, the currency and the amount of the balance.

CODES

In option F, or M, D/C Mark must contain one of the following codes (Error code(s): T51):

C	Credit	The (intermediate) closing balance is a credit balance.
D	Debit	The (intermediate) closing balance is a debit balance.

NETWORK VALIDATED RULES

Date must be a valid date expressed as YYMMDD (Error code(s): T50).

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03,T40,T43).

USAGE RULES

The content of this field will be repeated in field 60a of the subsequent netting statement message for this netting position.

All netting statement messages of a statement, except the last message, must contain field 62M (intermediate closing balance); the last message of the statement must contain field 62F (final closing balance).

7. Field 64: Closing Available Balance

FORMAT

1!a6!n3!a15d (D/C Mark)(Date)(Currency)(Amount)

PRESENCE

Optional

DEFINITION

This field indicates the funds which are available to the Receiver (if credit balance) or the balance which is subject to interest charges (if debit balance).

CODES

D/C Mark must contain one of the following codes (Error code(s): T51):

C	Credit	The closing available balance is a credit balance.
D	Debit	The closing available balance is a debit balance.

NETWORK VALIDATED RULES

Date must be a valid date expressed as YYMMDD (Error code(s): T50).

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03,T40,T43).

MT 970 Examples

For examples of this message type, see the Service Description of the netting system concerned.

MT 971 Netting Balance Report

Note: This message may only be sent and received after prior arrangement between a user and SWIFT.

MT 971 Scope

This message type is sent, on request or at pre-arranged times, from a netting system to a subscriber to the netting system and to other authorised receivers.

It is used to advise the netting balance(s), at the time of transmission, for one or more financial institutions.

MT 971 Format Specifications

MT 971 Netting Balance Report

Status	Tag	Field Name	Content/Options	No.
M	20	Transaction Reference Number	16x	1
----->				
M	25	Account Identification	35x	2
M	62F	Final Closing Balance	1!a6!n3!a15d	3

M = Mandatory, O = Optional				

MT 971 Network Validated Rules

There are no network validated rules for this message type.

MT 971 Field Specifications

1. Field 20: Transaction Reference Number

FORMAT

16x

PRESENCE

Mandatory

DEFINITION

This field specifies the reference assigned by the Sender to unambiguously identify this message.

NETWORK VALIDATED RULES

This field must not start or end with a slash '/' and must not contain two consecutive slashes '/' (Error code(s): T26).

2. Field 25: Account Identification

FORMAT

35x

PRESENCE

Mandatory

DEFINITION

This field identifies the netting position for which the balance is being sent.

3. Field 62F: Final Closing Balance

FORMAT

Option F 1!a6!n3!a15d (D/C Mark)(Date)(Currency)(Amount)

PRESENCE

Mandatory

DEFINITION

This field contains the balance for the netting position identified in field 25.

CODES

D/C Mark must contain one of the following codes (Error code(s): T51):

C	Credit	The final closing balance is a credit balance.
D	Debit	The final closing balance is a debit balance.

NETWORK VALIDATED RULES

Date must be a valid date expressed as YYYYMMDD (Error code(s): T50).

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03,T40,T43).

MT 971 Examples

For examples of this message type, see the Service Description for the netting system concerned.

MT 972 Netting Interim Statement

Note: This message may only be sent and received after prior arrangement between a user and SWIFT.

MT 972 Scope

This message type is sent, on request or at pre-arranged times, from a netting system to a subscriber to the netting system.

It is used to provide detailed information about transactions which have been recorded by the netting system involving the receiving financial institution.

MT 972 Format Specifications

MT 972 Netting Interim Statement

Status	Tag	Field Name	Content/Options	No.
M	20	Transaction Reference Number	16x	1
M	25	Account Identification	35x	2
M	28C	Statement Number/Sequence Number	5n[/5n]	3
M	60a	Opening Balance	F or M	4
----->				
O	61	Statement Line	6!n[4!n]2a[1!a]15d1!a3!c16x[//16x] [34x]	5

M	62a	Closing Balance	F or M	6
O	64	Closing Available Balance	1!a6!n3!a15d	7
M = Mandatory, O = Optional				

MT 972 Network Validated Rules

C1 The first two characters of the three character currency code in fields 60a, 62a and 64 must be the same (Error code(s): C27).

MT 972 Usage Rules

- Transactions may appear in more than one netting interim statement if more than one is generated for the same netting position.
- Entries must be sorted by ascending amount, within debits and credits.
- Since the length of a SWIFT message is restricted to the maximum input length, several messages may be required to accommodate all the information for one statement.

MT 972 Field Specifications

1. Field 20: Transaction Reference Number

FORMAT

16x

PRESENCE

Mandatory

DEFINITION

This field specifies the reference assigned by the Sender to unambiguously identify this message.

NETWORK VALIDATED RULES

This field must not start or end with a slash '/' and must not contain two consecutive slashes '/' (Error code(s): T26).

USAGE RULES

The TRN may be the same or different for the separate messages of a netting statement consisting of several messages.

2. Field 25: Account Identification

FORMAT

35x

PRESENCE

Mandatory

DEFINITION

This field identifies the netting position for which the netting interim statement is sent.

3. Field 28C: Statement Number/Sequence Number

FORMAT

Option C 5n[/5n] (Statement Number)(Sequence Number)

PRESENCE

Mandatory

DEFINITION

This field contains the statement number of the netting interim statement, optionally followed by the sequence number of the message within the statement, when more than one message is sent for the statement.

EXAMPLE

The first message of a statement is :28C:235/1

The second message is :28C:235/2 and so on.

4. Field 60a: Opening Balance

FORMAT

Option F	1!a6!n3!a15d	(D/C Mark)(Date)(Currency)(Amount)
Option M	1!a6!n3!a15d	(D/C Mark)(Date)(Currency)(Amount)

PRESENCE

Mandatory

DEFINITION

This field specifies, for the (intermediate) opening balance, whether it is a debit or credit balance, the date, the currency and the amount of the balance.

CODES

In option F, or M, D/C Mark must contain one of the following codes (Error code(s): T51):

C	Credit	The (intermediate) opening balance is a credit balance.
D	Debit	The (intermediate) opening balance is a debit balance.

NETWORK VALIDATED RULES

Date must be a valid date expressed as YYMMDD (Error code(s): T50).

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03,T40,T43).

USAGE RULES

This field must always be the same as field 62a (closing balance) of the previous netting interim statement message for this netting position.

The first netting interim statement message of a statement must contain field 60F (first opening balance); subsequent messages of the same statement must contain field 60M (intermediate opening balance).

5. Field 61: Statement Line

FORMAT

6!n[4!n]2a[1!a]15d1!a3!c16x[//16x]
[34x]

where subfields are:

Subfield	Format	Name
1	6!n	(Value Date)
2	[4!n]	(Entry Date)
3	2a	(Debit/Credit Mark)
4	[1!a]	(Funds Code)
5	15d	(Amount)
6	1!a3!c	(Transaction Type)(Identification Code)
7	16x	(Reference for the Account Owner)
8	[//16x]	(Reference of the Account Servicing Institution)
9	[34x]	(Supplementary Details)

PRESENCE

Optional

DEFINITION

This field contains the details of each transaction.

CODES

Subfield 3 Debit/Credit Mark must contain one of the following codes (Error code(s): T51):

C	Credit
D	Debit
RC	Reversal of Credit (debit entry)
RD	Reversal of Debit (credit entry)

CODES

In subfield 6, Transaction Type must contain one of the following codes (Error code(s): T53):

S	SWIFT transfer	For entries related to SWIFT transfer instructions and subsequent charge messages.
N	Non-SWIFT transfer	For entries related to payment and transfer instructions, including related charges messages, not sent through SWIFT or where an alpha description is preferred.

F	First advice	For entries being first advised by the statement (items originated by the account servicing institution).
---	--------------	---

CODES

In subfield 6, when Transaction Type is 'S', Identification Code will indicate the message type of the SWIFT message causing the entry (for debit entries) or the message type of the SWIFT message used to advise the account owner (for credit entries). It must be a number (format 3!n) in the range 100-999 (Error code(s): T18).

CODES

In subfield 6, when Transaction Type is 'N' or 'F', Identification Code may contain one of the following codes:

BNK	Securities Related Item - Bank Fees
BOE	Bill of Exchange
BRF	Brokerage Fee
CAR	Securities Related Item - Corporate Actions Related (should only be used when no specific corporate action event code is available)
CAS	Securities Related Item - Cash in Lieu
CHG	Charges and Other Expenses
CHK	Cheques
CLR	Cash Letters/ Cheques Remittance
CMI	Cash Management Item - No Detail
CMN	Cash Management Item - Notional Pooling
CMP	Compensation Claims
CMS	Cash Management Item - Sweeping
CMT	Cash Management Item - Topping
CMZ	Cash Management Item - Zero Balancing

COL	Collections (used when entering a principal amount)	
COM	Commission	
CPN	Coupons	Securities Related Item - Coupon Payments.
DCR	Documentary Credit (used when entering a principal amount)	
DDT	Direct Debit Item	
DIS	Securities Related Item - Gains Disbursement	
DIV	Dividends	Securities Related Item - Dividends.
EQA	Equivalent Amount	
EXT	Securities Related Item - External Transfer for Own Account	
FEX	Foreign Exchange	
INT	Interest	Interest related amount.
LBX	Lock Box	
LDP	Loan Deposit	
MAR	Securities Related Item - Margin Payments/Receipts	
MAT	Securities Related Item - Maturity	
MGT	Management fees	Securities Related Item - Management Fees.
MSC	Miscellaneous	
NWI	Securities Related Item - New Issues Distribution	
ODC	Overdraft Charge	
OPT	Securities Related Item - Options	
PCH	Purchase	Securities Related Item - Purchase (including STIF and Time deposits).
POP	Securities Related Item - Pair-off Proceeds	
PRN	Securities Related Item - Principal Pay-down/Pay-up	

REC	Reclaim	Securities Related Item - Tax Reclaim.
RED	Securities Related Item - Redemption/Withdrawal	
RIG	Securities Related Item - Rights	
RTI	Returned Item	
SAL	Sale	Securities Related Item - Sale (including STIF and Time deposits).
SEC	Securities	Securities (used when entering a principal amount).
SLE	Securities Related Item - Securities Lending Related	
STO	Standing Order	
STP	Securities Related Item - Stamp Duty	
SUB	Securities Related Item - Subscription	
SWP	Securities Related Item - SWAP Payment	
TAX	Securities Related Item - Withholding Tax Payment	
TCK	Travellers Cheques	
TCM	Securities Related Item - Tripartite Collateral Management	
TRA	Securities Related Item - Internal Transfer for Own Account	
TRF	Transfer	
TRN	Securities Related Item - Transaction Fee	
UWC	Securities Related Item - Underwriting Commission	

VDA	Value Date Adjustment (used with an entry made to withdraw an incorrectly dated entry - it will be followed by the correct entry with the relevant code)
WAR	Securities Related Item - Warrant

NETWORK VALIDATED RULES

Subfield 1, **Value Date**, must be a valid date expressed as YYMMDD (Error code(s): T50).

The SWIFT System validates subfield 2, **Entry Date** (Date in reduced ISO form), using current System Year (Error code(s): T50).

The integer part of subfield 5, Amount, must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length (Error code(s): T40,T43).

USAGE RULES

This field may be repeated within the constraints of the maximum input message length.

'Original' advice for charges, that is, the first time the account owner is informed of a charge, must be identified in subfield 6, with the **Transaction Type** 'F' and the **Identification Code** 'CHG'.

The following rules apply to subfield 7, **Reference for the Account Owner**:

- At least one valid character other than a blank must be present.
- For debit entries, the purpose of this subfield is to identify, to the account owner, the instruction which caused the debit. Therefore, the content of this subfield is the field 20 Sender's Transaction Reference Number (or its equivalent) of the original instruction.
- Credit entries may be the result of one of the following situations:
 1. The account servicing institution is identifying, to the account owner the receipt of funds for its account as a result of a related transaction. In this case, the content of subfield 7, Reference for the Account Owner is the reference for the beneficiary (for example, field 21 Related Reference) of the related transaction.
 2. The account servicing institution has issued a payment instruction to the account owner and the credit identified in this subfield is for that payment. The content of subfield 7, Reference for the Account Owner is the field 20 Transaction Reference Number (or its equivalent) of the payment instruction issued by the account servicing institution.
- If no reference is available for this subfield, the code NONREF shall be used. The account servicing institution must then supply, in subfield 9, **Supplementary Details**, what it considers to be the best alternative information.
- This reference must be quoted in all cases when available. In cases where a transaction passes through several financial institutions, the original reference must always be forwarded.
- This reference must always be quoted against any charges or fees debited by the account servicing institution.
- Debits against standing instructions must show the reference of the standing instruction.

- In cases where a mutually agreed alternative reference exists (for example, in foreign exchange or money market transactions), this reference should then be used.
- If the statement entry concerns a cheque, the cheque number should be indicated in this subfield.

The following rules apply to subfield 8, **Reference of the Account Servicing Institution**:

- The content of this subfield is the account servicing institution's own reference for the transaction.
- When the transaction has been initiated by the account servicing institution, this reference may be identical to subfield 7, Reference for the Account Owner. If this is the case, Reference of the Account Servicing Institution, subfield 8, may be omitted.

The following rules apply to subfield 9, **Supplementary Details**:

- When no reference for the account owner is available, that is, subfield 7, Reference for the Account Owner contains NONREF, the account servicing institution should provide the best available alternative information in this subfield.
- Supplementary details may be provided when an advice has not been sent for a transaction, or to provide additional information to facilitate reconciliation.

EXAMPLE

(1) : 61:0901230122C3500,25FCHK304955//4958843

(2) : 61:0901230122C3500,25FCHK304955//4958843

ADDITIONAL INFORMATION

6. Field 62a: Closing Balance

FORMAT

Option F	1!a6!n3!a15d	(D/C Mark)(Date)(Currency)(Amount)
Option M	1!a6!n3!a15d	(D/C Mark)(Date)(Currency)(Amount)

PRESENCE

Mandatory

DEFINITION

This field specifies, for the (intermediate) closing balance, whether it is a debit or credit balance, the date, the currency and the amount of the balance.

CODES

In option F, or M, D/C Mark must contain one of the following codes (Error code(s): T51):

C	Credit	The (intermediate) closing balance is a credit balance.
D	Debit	The (intermediate) closing balance is a debit balance.

NETWORK VALIDATED RULES

Date must be a valid date expressed as YYYYMMDD (Error code(s): T50).

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03,T40,T43).

USAGE RULES

The contents of this field will be repeated in field 60a (opening balance) of the subsequent netting interim statement message for this netting position.

All netting interim statement messages of a statement, except the last message, must contain field 62M (intermediate closing balance); the last message of the statement must contain field 62F (final closing balance).

7. Field 64: Closing Available Balance

FORMAT

1!a6!n3!a15d (D/C Mark)(Date)(Currency)(Amount)

PRESENCE

Optional

DEFINITION

This field indicates the funds which are available to the Receiver (if credit balance) or the balance which is subject to interest charges (if debit balance).

CODES

D/C Mark must contain one of the following codes (Error code(s): T51):

C	Credit	The closing available balance is a credit balance.
D	Debit	The closing available balance is a debit balance.

NETWORK VALIDATED RULES

Date must be a valid date expressed as YYMMDD (Error code(s): T50).

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03,T40,T43).

MT 972 Examples

For examples of this message type, see the Service Description of the netting system concerned.

MT 973 Netting Request Message

Note: This message may only be sent and received after prior arrangement between a user and SWIFT.

MT 973 Scope

This message type is sent by a financial institution to a netting system.

It is used to request the netting system to transmit an MT 971 Netting Balance Report, an MT 972 Netting Interim Statement or an MT 998 Proprietary Message containing the latest available information.

MT 973 Format Specifications

MT 973 Netting Request Message

Status	Tag	Field Name	Content/Options	No.
M	20	Transaction Reference Number	16x	1

MT 973 Network Validated Rules

There are no network validated rules for this message type.

MT 973 Field Specifications

1. Field 20: Transaction Reference Number

FORMAT

16x

PRESENCE

Mandatory

DEFINITION

This field specifies the reference assigned by the Sender to unambiguously identify the message.

NETWORK VALIDATED RULES

This field must not start or end with a slash '/' and must not contain two consecutive slashes '/' (Error code(s): T26).

2. Field 12: Message Type

FORMAT

3!n

PRESENCE

Mandatory

DEFINITION

This field identifies the message type which is being requested.

CODES

This field must contain one of the following message type numbers (Error code(s): T88):

971	Netting Balance Report
972	Netting Interim Statement
998	Proprietary Message

3. Field 25: Account Identification

FORMAT

35x

PRESENCE

Mandatory

DEFINITION

This field identifies the netting position for which balance or transaction detail information is requested.

MT 973 Examples

For examples of this message type, see the Service Description and Functional Requirement Specifications for the netting system concerned.

MT 985 Status Enquiry

MT 985 Scope

This message type is sent by a financial institution, to another financial institution, to request an MT 986 Status Report.

MT 985 Format Specifications

MT 985 Status Enquiry

Status	Tag	Field Name	Content/Options	No.
M	20	Transaction Reference Number	16x	1
O	57a	Account With Institution	A, B, or D	2
M	59	Enquired Party	[/34x] 4*35x	3
O	75	Queries	6*35x	4
M = Mandatory, O = Optional				

MT 985 Network Validated Rules

There are no network validated rules for this message type.

MT 985 Field Specifications

1. Field 20: Transaction Reference Number

FORMAT

16x

PRESENCE

Mandatory

DEFINITION

This field specifies the reference assigned by the Sender to unambiguously identify the message.

NETWORK VALIDATED RULES

This field must not start or end with a slash '/' and must not contain two consecutive slashes '/' (Error code(s): T26).

2. Field 57a: Account With Institution

FORMAT

Option A	[/1!a]/[34x] 4!a2!a2!c[3!c]	(Party Identifier) (Identifier Code)
Option B	[/1!a]/[34x] [35x]	(Party Identifier) (Location)
Option D	[/1!a]/[34x] 4*35x	(Party Identifier) (Name and Address)

PRESENCE

Optional

DEFINITION

This field identifies the financial institution and/or branch of the financial institution of the enquired party.

NETWORK VALIDATED RULES

Identifier Code must be a registered financial institution BIC (Error code(s): T27,T28,T29,T45).

Identifier Code must be a financial institution BIC. This error code applies to all types of BICs referenced in a FIN message including SWIFT BICs, non-SWIFT BICs, Masters, Synonyms, Live destinations and Test & Training destinations (Error code(s): C05).

USAGE RULES

When this information is known, it should be specified, even when it is the Receiver of the message.

3. Field 59: Enquired Party

FORMAT

[/34x]	(Account)
4*35x	(Name and Address)

PRESENCE

Mandatory

DEFINITION

This field specifies the party about which information is requested.

USAGE RULES

When an account number is provided, it is the account number on the books of the Receiver.

4. Field 75: Queries

FORMAT

6*35x (Narrative)

PRESENCE

Optional

DEFINITION

This field is used when information other than general credit information is requested for the enquired party.

USAGE RULES

This field contains a narrative explanation of the information requested.

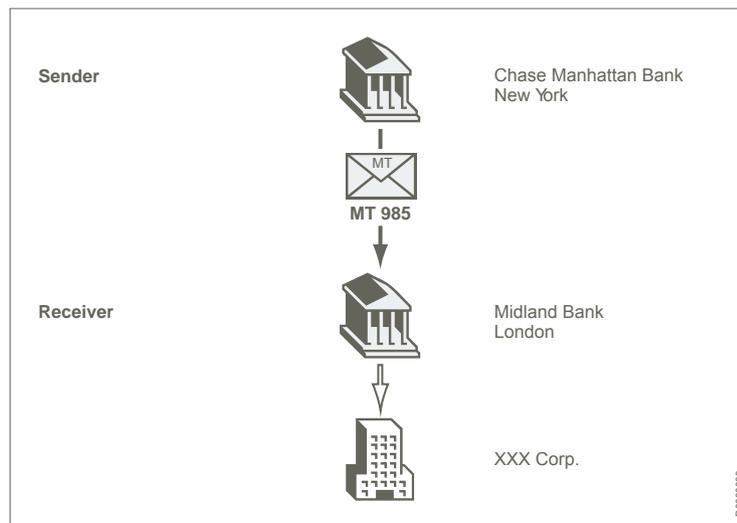

MT 985 Examples

Narrative

Chase Manhattan Bank, New York, requests Midland Bank, London, to provide credit information about its customer XXX Corporation, located at 110 Highgrove Street, London.

Chase Manhattan will send an MT 985 to request this information.

Glossary of Terms

In addition to the definitions which appear in the *Standards MT General Information*, Glossary of Terms, the following terms apply to Category 9 message types:

Account Servicing Institution	A financial institution which is a depository for an account.
Account Servicing Institution's Reference	A reference assigned by the account servicing institution to identify the transaction. (This is the reference to which the account owner refers in cases of inquiry to that financial institution.)
Available Balance	The balance at the disposal of the account owner on the date specified. The specific formula for the calculation of the balance is dependent upon national, local, legal or bilateral agreement/conventions/requirements.
Available Funds	Funds available for transfer or withdrawal in cash.
Bulking	The practice of totalling the amounts of a number of transactions to provide a single accounting entry.
Closing Available Balance	Amount at the disposal of the account owner at the close of the statement period.
